

1. Record Nr.	UNINA9910865292203321
Autore	Bhardwaj Abhishek Kumar
Titolo	Biogenic Wastes-Enabled Nanomaterial Synthesis : Applications in Environmental Sustainability
Pubbl/distr/stampa	Cham : , : Springer, , 2024 ©2024
ISBN	9783031590832 9783031590825
Edizione	[1st ed.]
Descrizione fisica	1 online resource (396 pages)
Altri autori (Persone)	SrivastavArun Lal RaiSwapnil
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Contents -- A Review on Agricultural Wastes-Based Green Metal and Metal Oxide Nanoparticles -- 1 Introduction -- 2 Agricultural Wastes and Their Types -- 2.1 Straw -- 2.2 Rice Husk and Rice Husk Ash -- 2.3 Sugarcane Bagasse -- 2.4 Corncob -- 2.5 Plant Leaves -- 2.6 Fruit and Vegetable Peels -- 3 Synthesis of Metal/Metal Oxide Nanoparticles -- 3.1 Synthesis of Silver Nanoparticles -- 3.2 Synthesis of Gold Nanoparticles -- 3.3 Synthesis of Silica Nanoparticles -- 3.4 Synthesis of Other Metal/Metal Oxide Nanoparticles -- 4 General Applications -- 5 Future Perspectives -- 6 Concerns -- 7 Conclusion -- References -- Fabrication of Metal NPS from Plant Root and Tuber -- 1 Introduction -- 2 Biosynthesis of MNPs Using Plant Extract -- 2.1 Mechanism of MNP Synthesis -- 2.2 AgNPS -- 2.3 AuNPs -- 2.4 ZnNPs -- 2.5 Ti NPs -- 2.6 PdNPs -- 2.7 Others -- 3 Secondary Metabolite/Phytochemical Effect in Bioreduction Reaction -- 4 Pharmacological Applications of MNPs -- 4.1 Antibacterial -- 4.2 Antifungal -- 4.3 Anti-inflammatory -- 4.4 Anticancer -- 4.5 Antiviral -- 4.6 Antidiabetics -- 4.7 Antioxidant -- 5 Commercial Application of Root- and Tuber-Mediated MNPs -- 5.1 Wastewater Treatment -- 5.2 Cosmetics -- 5.3 Food Industry -- 6 Factors Influencing the Synthesis of MNPs -- 7 Conclusions -- References -- Isolation of Various Carbon-Rich Materials from Bio-based Sources and Their

Utilization -- 1 Introduction -- 2 Synthesis of Carbonaceous Materials Derived from Biomass -- 2.1 Typical Biomass Precursors -- 2.2 Carbonization Driven by Hydrothermal Processes -- 2.3 Pyrolysis Methods -- 2.4 Laser-Induced Graphitization -- 2.5 Other Thermal Treatment Methods -- 2.6 Comparison Between Synthesis Methods -- 3 Synthetic Mechanisms of Carbon-Rich Materials Derived from Bio-waste -- 4 Applications of Bio-waste-Derived Carbon Materials. 4.1 Applications in Energy and Related Field -- 4.2 Applications in Electronics -- 4.3 Environmental and Other Applications of Carbon Materials Derived from Biomass -- 5 Summary and Future Perspective -- 6 Conclusions -- References -- Green Fabrication of Magnetic Nanomaterial and Their Application -- 1 Introduction -- 2 Green Synthesis -- 3 Synthesis of Magnetic Nanoparticles by Microorganism -- 4 Green Synthesis of Magnetic Nanoparticles by Plants -- 5 Application of Magnetic Nanoparticles -- 5.1 Biological Activities -- 5.2 Antibacterial Activity -- 5.3 Antifungal Activity -- 5.4 Larvicidal Activities -- 5.5 Antioxidant Activities -- 6 Environmental Remediation -- 7 Catalysis -- 8 Agriculture -- 9 Other Biological Applications -- 10 Present Status, Challenges, and Future Remarks -- 11 Conclusion -- References -- A Synthesis of Biogenic Nanoparticles (NPs) for the Treatment of Wastewater and Its Application: A Review -- 1 Introduction -- 2 Routes of Synthesis of Biogenic Nanoparticles (NPs) -- 2.1 Plants -- 2.2 Microorganisms -- 2.2.1 Bacteria -- 2.2.2 Fungi -- 2.2.3 Yeast -- 3 Applications of Biogenic Nanoparticles (NPs) for the Treatment of Wastewater -- 3.1 Removal of Organic Pollutants -- 3.2 Removal of Pharmaceutical Pollutants -- 3.3 Removal of Inorganic and Radioactive Pollutants -- 3.4 Removal of Heavy Metals -- 4 Conclusions and Future Recommendations -- References -- Fungi's Involvement in Metal NPS Synthesis and Environmentally Sustainable Practices -- 1 Introduction -- 2 Mycogenic Nanoparticles and Nanominerals -- 3 Fungal-Mediated Synthesis of Nanoparticles -- 4 Formation of Fungal Nanoparticles -- 5 Different Methods of Nanoparticle Synthesis -- 6 Present Status of Fungal NPS -- 7 Exclusive Fungi Involve in Nanoparticles' Role -- 8 Future Prospects of Fungal NPS and Sustainability -- 9 Conclusion -- References. Green Synthesis of Organic Nanomaterials and Their Applications -- 1 Classification of Nanoparticles -- 1.1 Commonly Recognized Classes of NPS -- 1.1.1 Dendrimers -- 1.1.2 Nanocapsules -- 1.1.3 Polymeric NPs -- 1.2 Fullerene and Carbon Nanotubes (CNTs) -- 1.3 Nanocochleates -- 1.4 Liposomes -- 1.5 Micelles -- 1.6 Generating Nanoparticles: Techniques and Approaches -- 1.7 Top-Down Approach -- 1.8 Bottom-Up Approach -- 1.9 Methods of Preparation of Nanoparticles -- 1.10 Emulsification-Based Two-Step Technique -- 1.11 Generation of Nanoparticles from Emulsion -- 1.12 One-Step Procedures -- 1.12.1 Nanoprecipitation -- 1.12.2 Dialysis -- 1.12.3 Desolvation -- 1.13 Green Synthesis of NP -- 1.14 Dry Processes or Supercritical Drying -- 1.14.1 Spray Drying -- 1.15 Biological Method for Synthesis of NP -- 1.15.1 By Bacteria -- 1.15.2 By Plant -- 2 Applications in Pharmaceuticals and Therapeutics -- 3 Applications in Food Industry -- 4 Applications in Bioimaging -- 5 Applications in Gene Therapy -- 6 Applications as Antibacterial Agents -- 7 Applications in Bone Cell Synthesis -- 8 Outlook for the Future -- 9 Conclusion and Summary of the Chapter -- References -- Synthesis of Metal NPs Using Plant Flowers and Fruits -- 1 Introduction -- 2 Importance of Flowers and Fruits in Daily Life -- 2.1 Flowers -- 2.2 Fruits -- 3 Green Synthesis of Nanoparticles -- 4 Green Synthesis of Nanoparticles Mediated by Flowers and Fruits -- 4.1 Silver Nanoparticles (AgNPs) -- 4.2 Gold Nanoparticles (AuNPs) -- 4.3 Other

Nanoparticles -- 4.3.1 Copper Oxide Nanoparticles (Cu₂ONPs) -- 4.3.2 Zinc Oxide Nanoparticles (ZnONPs) -- 5 Characterization of NPs -- 5.1 Biological Activities of Flower- and Fruit-Derived MNPs -- 5.2 Antibacterial Activity -- 5.3 Antioxidant Activity -- 5.4 Insecticidal Activity -- 5.5 Catalytic Activity -- 5.6 Other Activities -- 5.6.1 Anti-cancer Activity. 5.6.2 Anti-microbial Activity -- 6 Future Scope in the Use of Flower- and Fruit-Mediated MNPs -- 7 Conclusion -- References -- Recent Advancements in the Green Synthesis of Bioactive Metallic Nanoparticles from Biological Entities and Their Biomedical Applications -- 1 Introduction -- 2 Synthesis of Nanoparticles -- 2.1 Silver Nanoparticles -- 2.2 Gold Nanoparticles -- 2.3 Copper Nanoparticles -- 2.4 Zinc Nanoparticles -- 2.5 Other Metal Nanoparticles -- 3 Factors That Influence the Structure and Morphology of Nanoparticles -- 4 Application of Bioactive Metallic Nanoparticles -- 5 Conclusion -- References -- Green Synthesis of Algal Nanoparticles: Harnessing Nature's Biofactories for Sustainable Nanomaterials -- 1 Introduction -- 2 Nanomaterials: Unveiling Synthesis Routes for Sustainable Fabrication -- 3 Bio-Based Green Approach for Nanomaterial Synthesis -- 4 Algae-Mediated Nanoparticle Synthesis: Sustainable Approach for Nanoparticle Production -- 5 Algal Routes for the Biosynthesis of Nanoparticles -- 5.1 NP Synthesis from Living Algal Cells -- 5.2 NP Synthesis Using Extracted Biomolecules -- 5.3 NP Synthesis Using Cell-Free Supernatant -- 5.4 NP Synthesis Using Whole Algal Cells -- 6 Factors Affecting the Synthesis Process -- 6.1 pH of Reaction-Mixture -- 6.2 Temperature -- 6.3 Particle Shape and Size -- 6.4 Pore Size -- 6.5 Pressure -- 6.6 Incubation Time -- 6.7 Precursor Metallic Ion Concentration -- 7 Perspective on the Green Synthesis of Algae-Mediated Nanomaterial -- 7.1 Biomedical Applications -- 7.2 Environmental Remediation -- 7.3 Agriculture and Crop Enhancement -- 7.4 Energy and Solar Applications -- 7.5 Nanoelectronics and Optoelectronics -- 8 Challenges -- 9 Conclusion -- References -- Eco-Friendly Production of Organic Nanoparticles and Their Uses -- 1 Introduction -- 2 Green Chemistry. 2.1 Green Chemistry Objectives (Rowena, 2019) -- 2.2 Green Chemistry Framework -- 2.3 Principles of Green Chemistry -- 3 Nanomaterials -- 3.1 Classification of Nanomaterials -- 3.2 Synthesis of Nanoparticles -- 3.3 Green Synthesis of Nanoparticles -- 3.4 Factors Influencing the Green Synthesis of Various Nanoparticles -- 4 Green Synthesis of Organic Nanoparticles -- 4.1 Nanoliposomes -- 4.2 Solid Lipid Nanoparticles (SLNs) -- 4.3 Nanoemulsions -- 4.4 Polymeric Nanoparticles -- 4.5 Dendrimers -- 4.6 Carbon-Based Nanomaterials -- 4.7 Prospective Applications of Green-Synthesized Organic Nanoparticles -- 5 Conclusions -- References -- Biogenic Synthesis of Nanomaterials and Their Therapeutic Application on Fishes -- 1 Introduction -- 1.1 Bacterial Infection -- 2 Synthesis of Nanoparticles -- 3 Therapeutic Application of Metal Nanoparticles in Fishes -- 3.1 Silver Nanoparticles -- 3.2 Copper Nanoparticles -- 3.3 Zinc Nanoparticles -- 3.4 Gold Nanoparticles -- 3.5 Selenium NPs -- 4 Reported Nanomaterials in Fish Disease Control -- 5 Conclusion -- References -- Nanomaterial Synthesis Using Tyre and Plastic -- 1 Introduction -- 2 Uniqueness of Synthesized Nanomaterials from Waste -- 3 Applications of Synthesized Nanomaterials -- 4 Case Studies and Examples of Nanomaterials from Rubber Tyres -- 5 Impact of COVID and Generation of Plastic Waste -- 6 Case Studies and Examples of Nanomaterials from Plastic Wastes -- 7 Characterization of Nanomaterials from Plastic and Tyre Waste -- 7.1 Structural Characterization -- 7.1.1 FT-IR (Fourier Transform Infrared

Spectroscopy) -- 7.1.2 X Ray Techniques -- 7.1.3 NMR (Nuclear Magnetic Resonance) Spectroscopy -- 7.1.4 BET (Brunauer-Emmett-Teller) Technique -- 7.1.5 TGA (Thermogravimetric Analysis) -- 7.1.6 LEIS (Low Energy Ion Scattering) -- 7.1.7 UV (Ultra Violet) Spectroscopy -- 7.1.8 MS (Mass Spectroscopy).
7.1.9 ICP-MS (Inductively Coupled Plasma Mass Spectrometry).
