Sommario/riassunto

This book explores the world of e-government - the use by
government of IT to interact with citizens, businesses, and other
governments - and the significant role of IT corporations in this
process in seven countries. Government information systems are big
business (around 1.5% of GDP) and critical to all aspects of public policy
and operations.

Sommario/riassunto	Chaque annee depuis 1994, les journees du longitudinal (JDL) constituent un temps fort de la vie scientifique du Cereq. Elles sont co-organisees par le Cereq et un des centres associes de son reseau et reunissent des chercheurs et chercheuses autour d'une problematique inscrite dans une approche longitudinale de l'analyse de la relation formation-emploi. Les actes des rencontres sont edites tous les ans par le Cereq. C'est le centre associe d'Aix-en-Provence (Laboratoire d'economie et de sociologie du travail [LEST], UMR 7317) qui accueille les 29e journees sur la thematique : « Crises et transitions : quelles donnees pour quelles analyses ? ». Comment les crises et les transitions (economique, sociale, migratoire, sanitaire.) affectent les parcours de vie ? Quel les transformations imposent-elles ? Il s'agit de penser en particulier les recompositions des parcours educatifs et professionnels mais aussi de s'interesser aux types de donnees et methodes permettant de saisir la multidimensionnalite des elements constitutifs de ces trajectoires.
