Livello bibliografico	Monografia
Sommario/riassunto	<p>Most suffered severe declines in work and earnings during successive waves of the COVID pandemic, and related restrictions and recessions, and have gone deeper into debt and depleted their savings and assets in order to survive. This book explores and informs answers to that key challenge. It presents findings on the impact of the COVID crisis on informal workers in Asia, Africa, and North and Latin America. The chapters analyse the impact of the COVID crisis on informal workers, interrogate whether and which economic recovery plans and schemes include informal workers, and explore what a more inclusive economic recovery and reforms might look like.</p>
