

1. Record Nr.	UNINA9910867297203321
Titolo	Biotechnology for the environment
Pubbl/distr/stampa	London : , : BioMed Central, , 2024-
ISSN	2948-2356
Descrizione fisica	1 online resource
Soggetti	Bioremediation Biotechnology - Environmental aspects Environmental management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Nota di bibliografia	Includes bibliographical references (pages) and index.
Sommario/riassunto	Biotechnology for the Environment is an open access, peer-reviewed journal featuring studies that explore the advancements and applications of biotechnology for environmental management, protection, and sustainability, including agriculture and forestry. The journal also aims to advance the discussion around the complex interplay between environmental issues and bioproduction through insightful and diverse research.
