

1. Record Nr.	UNISA990000069600203316
Autore	Biblioteca Antoniana <Padova>
Titolo	Incipitario dei manoscritti della biblioteca antoniana di Padova / a cura di Giovanni Luisetto
Pubbl/distr/stampa	Padova : Centro Studi Antoniani, c1996
ISBN	85-85155-24-3
Descrizione fisica	XXXI, 483 p. ; 27 cm
Collana	Fonti e studi francescani ; 6
Altri autori (Persone)	LUISETTO, Giovanni
Disciplina	016.091
Collocazione	I 2 1C 172(XIV 1146/6.1)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910869159703321
Autore	Elkhatabi El Mehdi
Titolo	Advanced Materials for Sustainable Energy and Engineering : Selected Proceedings of the 2023 International Conference on Advanced Materials for Sustainable Energy and Engineering (ICAMSEE) // edited by El Mehdi Elkhatabi, Mourad Boutahir, Konstantinos Termentzidis, Kohji Nakamura, Abdelhai Rahmani
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031570223 9783031570216
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (554 pages)
Collana	Springer Proceedings in Energy, , 2352-2542
Altri autori (Persone)	BoutahirMourad TermentzidisKonstantinos NakamuraKohji RahmaniAbdelhai
Disciplina	620.1
Soggetti	Materials Catalysis Force and energy Photovoltaic power generation Sustainability Nanotechnology Materials science - Data processing Materials for Energy and Catalysis Photovoltaics Computational Materials Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Contents -- Ensemble Learning Method for Forecasting HVAC System Demand -- 1 Introduction -- 2 Literature Review -- 3 Methodology -- 3.1 Ensemble Learning Methods [2] -- 3.2 Case Study and Data Set Information -- 4 Results and Discussion -- 5 Conclusion -- References -- RBDO Approach for Site-to-Wind Turbine Generator Pairing -- 1 Introduction -- 2 Literature Review -- 3 Methodology

Review -- 3.1 RBDO Approach -- 4 Problem Formulation -- 4.1
Wind Turbine Performance -- 4.2 Cost Function of the Wind Power
Generation -- 5 Conclusion and Future Work -- References --
Investigation Performance of Shell-and-Tube Heat Exchangers
in an Energy Storage System: Thermo-Mechanic Load -- 1
Introduction -- 2 Method and Material -- 3 Result and Discussion --
4 Conclusion -- References -- Numerical Thermal Analysis of Shell-
and-Tube Thermal Energy Storage Under the Constraint of High Cycle
Temperatures -- 1 Introduction -- 2 Numerical Model -- 3 Result
and Discussion

Sommario/riassunto

This book presents selected peer-reviewed proceedings from the International Conference on Advanced Materials, Sustainable Energy, and Engineering (ICAMSEE2023), held at Ecole Normale Supérieure, University Moulay Ismail Meknes, Morocco, from November 27 to 29, 2023. The conference served as an exceptional platform for international and national scientists, professors, students, and industry professionals to convene and exchange knowledge in the fields of materials science, microscopy, engineering, technology, and energy. The book features contributions from researchers and experts, including keynote speakers, special sessions, posters, and tutorials, showcasing the latest advancements and developments in these areas of research. The topics covered in this book span a wide array of subjects within the realm of advanced materials, sustainable energy, and engineering. The forefront of materials science is explored, including nanomaterials, carbon nanotubes, graphene, materials for various applications, environmental protection, advanced optical materials, thermoelectric and magnetic materials, and additive manufacturing. Addressing the energy demands of today, the focus extends to novel materials for solar cells, energy storage, electronic devices, solar and wind energy, advanced thermal management materials, and materials for advanced water treatment and desalination. Sustainable energy and engineering topics encompass energy policy, clean energy production technologies, carbon capture and utilization, biomass energy, building energy efficiency, smart systems for climate change, and energy efficiency in mineral processing. Additionally, the book covers modeling and numerical simulations in material science, encompassing model development, computational techniques, and simulations in both material science and energy fields.
