## Sommario/riassunto

This textbook explains what pharmacy students and practicing pharmacists need to know about pharmacy and the law, including recent changes in the National Health Service. The book provides easy accessibility and concise, yet comprehensive information. There have been many changes in the NHS and in the law relating to pharmacy since the first edition was written. Therefore, the book has been thoroughly revised, and the text re-organized.

Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (146 pages)
Disciplina	616.83106515
Soggetti	Ophthalmology Malaltia d'Alzheimer Oftalmologia Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Part 1: Introduction -- Chapter 1. Alzheimer's Disease -- Chapter 2. Rates of Dementia -- Chapter 3. Biomarkers and Clinical Endpoints -- Chapter 4. Ocular Biomarkers -- Part 2: Diagnosis -- Chapter 5. Biochemical and Neuroimaging -- Chapter 6. Cognitive Decline -- Chapter 7. EEG/ERP -- Chapter 8. Eye Tracking -- Chapter 9. Light Intervention -- Chapter 10. Retina -- Chapter 11. Tears -- Chapter 12. Telemedicine -- Chapter 13. Virtual Reality -- Part 3: Treatment -- Chapter 14. Recruiting Trials in the US -- Chapter 15. Not Yet Recruiting Trials in the US.
Sommario/riassunto	This book is a compendium of the worldwide studies of Alzheimer's disease utilizing the eye as a biomarker, or as a treatment method, that are registered with the United States National Institutes of Health website, <a href="https://clinicaltrials.gov">clinicaltrials.gov</a> . <a href="https://clinicaltrials.gov">Clinicaltrials.gov</a> is the largest listing of research studies in the world. The study titles are provided, as is the country of origin and the Clinical Trial Number in order to make it easier for the reader to locate the study and obtain further information. New drug development is costly and time consuming. If through the use of biomarkers, study durations and research costs decrease, there is a greater possibility of a new and effective drug to treat this devastating disease. The eye offers the possibility of early diagnosis

and of treatment. Alzheimer's Disease and the Eye is a valuable resource for ophthalmologists, optometrists, other physicians, and researchers.
