1. Record Nr. UNINA9910872188503321

Autore	Ivanov Vitalii
Titolo	Advances in Design, Simulation and Manufacturing VII : Proceedings of the 7th International Conference on Design, Simulation, Manufacturing: the Innovation Exchange, DSMIE-2024, June 4-7, 2024, Pilsen, Czech Republic - Volume 2: Mechanical and Materials Engineering
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2024 ©2024
ISBN	9783031637209 9783031637193
Edizione	[1st ed.]
Descrizione fisica	1 online resource (467 pages)
Collana	Lecture Notes in Mechanical Engineering Series
Altri autori (Persone)	PavlenkoIvan EdlMilan MachadoJose XuJinyang
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Design Engineering -- Optimization of the Counterweight Mass of a Passenger Elevator -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- An Increase in the Service Life and Reliability of Machines' Structural Components Using Innovative Engineering Solutions -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Modernization of the Drive Belt Transmission for the Machining Center -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 3.1 Machine Center Design -- 3.2 3D Modeling of MC Drive -- 3.3 Parametric Modeling of Modified Belt Drive -- 4 Results and Discussion -- 4.1 Structural Part of the TVBT Development -- 4.2 Experimental Part -- 4.3 Discussion -- 5 Conclusions -- References -- An Increase in the Durability of Pumping Equipment -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions --

References -- Design Improvement and Computer Modeling of the Finger Grain Crusher -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Investigation of Cylindrical Particles Sphericity and Roundness Based on the Extreme Vertices Model -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 3.1 Overall Principles of Spheres and Rounded Particles with Different Shape Factors -- 3.2 Sphericity of Elements -- 3.3 Rounded Particles (Elements) -- 4 Results and Discussion -- 4.1 Basic Properties of Extreme Vertices. Modeling of Elements (Particles) -- 4.2 Correlation Dependencies of Sphericity and Roundness According to the Developed Theory of Extreme Vertices -- 4.3 Discussion of the Obtained Results. 5 Conclusions -- References -- Design Improvement of the Rotary-Pulsation Device by Resonance Phenomena -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Experimental Justification of the Technological Parameters for the Mobile Branch Trimmer -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- An Approach for Modeling City Defense Means: Sumy Region Case Study -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 3.1 Flowchart of the Research and Analysis of Practical Experience -- 3.2 Analysis of the Main Stages for Modeling City Defense Means -- 4 Results and Discussion -- 5 Conclusions -- References -- Hysteresis Compensation of Pneumatic Artificial Muscles Using Correctional Curve Offset: Case Study -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 3.1 Structure and Operating Principle of the Installation Under Study -- 3.2 Principles and Main Stages of the Study -- 4 Results and Discussion -- 5 Conclusions -- References -- Dynamics and Strength of Machines -- Elastic Bending of a Strip Under the Action of Applied Forces -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- ANFIS System for Stress Prediction of Cold Heading Fastener Body Process for a Steel Base Composite Aluminum -- 1 Introduction -- 2 Literature Review -- 2.1 ANFIS System -- 2.2 Lightweight Material -- 2.3 DEFORM Simulation -- 3 Research Methodology -- 3.1 ANFIS Model -- 3.2 Composite Steel Base Aluminium Core -- 4 Results and Discussion -- 4.1 DEFORM Simulation -- 5 Conclusions -- References -- The Influence of Texture Discreteness on the Stress-Strain State of the Tribosurface After Preliminary Profiling.
1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Analyzing the Locomotion Conditions of a Wheeled Vibration-Driven System with a V-Shaped Suspension -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 3.1 Dynamic Diagram of the Wheeled Vibration-Driven System with a V-Shaped Spring-Damper Suspension -- 3.2 Mathematical Model Describing Robot Locomotion -- 3.3 Simulation Model of the Robot Developed in the SolidWorks Software -- 4 Results and Discussion -- 4.1 Numerical Modeling of the System Dynamic Behavior in the Mathematica Software -- 4.2 Computer Simulation of the System Locomotion in the SolidWorks Software -- 4.3 Experimental Testing of the System Locomotion Conditions -- 4.4 Discussion -- 5 Conclusions -- References -- Methods of Calculating the Basis Reinforced with Horizontal Elements -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Research of the Stress-Strain State of Anisotropic Parts of Interference Fits Based

on the Variational RVR-Method -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Study of the Stress-Strain State in the Contact Zone of the Cylinder Liner's Working Surface -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Dynamic Analysis of a Tennis Ball Launcher System -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Simulation of Thermal Stresses in Multiplayer Plates of Non-canonical Shape -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 3.1 The Heat Conduction Problem.
3.2 The Thermal Elasticity Problem -- 4 Results and Discussion -- 5 Conclusions -- References -- Process Engineering -- Vibroextraction from Pre-treated Amber by Electro-impulse Discharges -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Study of Thermophysical Processes in the Thermopressor for Contact Cooling Systems -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- The Influence of the Impeller Inter-blade Channels Roughness on the Energy Parameters of the Submersible Pump -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 4.1 Results of the Research -- 4.2 Discussion of Research Results -- 5 Conclusions -- References -- Efficient Models of Turbo Units for Evaluating Dynamic Characteristics -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 4.1 Mathematical Modelling -- 4.2 Calculation Models -- 4.3 Natural Frequency Calculations -- 4.4 Forced Oscillation Calculations -- 4.5 Discussion -- 5 Conclusions -- References -- Assessing the Reliability of a Mathematical Model of Working Processes Occurring in a Hydraulic Drive -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Thermodynamic and Exergetic Analysis of the Coolers for Mineral Fertilizers -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Changing the Output Characteristics of a Planetary Hydraulic Motor -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References.
Analysis of Cooling Air at the Inlet of Marine Engine with Exhaust Gas Recirculation by Ejector and Absorption Refrigeration -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Improving the Performance of a Centrifugal Compressor Through Computer-Aided Design and Optimization of Blade Thickness -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 4.1 Adequacy of Modelling -- 4.2 Optimization of the Impeller -- 4.3 Discussion -- 5 Conclusions -- References -- Advanced Materials -- Application of Expanded Perlite in the Composition of Paper for Writing and Printing -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Tribological Tests of Nanometric Coatings Used for Mechatronic Components with Increased Wear-Resistance -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 3.1 Materials -- 3.2 Thin Layers Deposition -- 3.3 Mechatronic Components Testing -- 3.4 Characterization Methods -- 4 Results and Discussion -- 4.1

Tribological Characterization of the Thin Layers' Surfaces -- 4.2 Physical-Mechanical Characterization of the Thin Layers' Surfaces -- 4.3 Tribological Characterization of Thin Layers' Surfaces After the Scratching Tests -- 4.4 Topographic Characterization of the Mechatronic Components Surfaces -- 4.5 Physical-Mechanical Characterization of the Mechatronic Components -- 4.6 Tribological Characterization of the Thin Layers' Surfaces Subjected to Functional Tests -- 5 Conclusions -- References -- Optimization of Surfacing Modes for a Wear-Resistant Alloy -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References.
Application of Nanomaterials and Nanotechnologies to Increase the Durability of Agricultural Machinery Working Bodies.
