Sommario/riassunto

Dans la plupart des metiers, ce sont des mentor-es qui assument la transmission du metier a autrui. Neanmoins, endosser cette fonction ne va pas de soi. Ce contexte de formation d'adultes entre mentor-es et stagiaires presente differentes dimensions: observation, imitation, mise en pratique, sans oublier les entretiens. C'est l'analyse des entretiens menes dans le contexte de la transmission du metier enseignant en alternance, qui est mise en exergue dans cet ouvrage. Ainsi, au travers d'une demarche de formation des mentor-es nommee mentoring conversation studies, concues selon le modele des lesson studies, l'auteure presente comment, dans ce contexte, des mentor-es en formation d'adultes se developpent en profondeur, en termes de reflexivite et d'autoregulation. Enfin, l'analyse fine des entretiens presentee dans ce livre questionne les dispositifs actuels de formation destines aux mentor-es, et, en corollaire, les effets d'une absence de dispositif destine a ce public.

Sommario/riassunto	<p>One of the highest priorities for human societies in the 21st century, under the challenges of predicted great environmental changes, is to conserve all kinds of biodiversity across the planet. Among all the biota that exist on Earth, forest ecosystems demonstrate a high degree of biodiversity, being thought to comprise the most diverse ecosystems, as most of the terrestrial species in the world dwell in these ecosystems. Forest biodiversity is interlinked to a web of socio-economic factors, providing an array of goods and services that range from timber and non-timber forest resources to mitigating climate change and conservation of genetic resources; therefore, it is innately linked to ecosystems and human well-being. However, in recent decades, the decrease in forest biodiversity has been a crucial and ongoing environmental issue that needs special attention and adapted ecosystem management. This Special Issue book on forest biodiversity (FB) includes a selected number of research works from all over the world dealing with emerging issues, for understanding FB and its needs for conservation, ecological processes, disturbances, climate change and ecosystems resilience, structural complexity and ecosystem functions, ecological theories and silvicultural practices, and ecosystems stability. More specifically, it includes papers focused on the indicators and methods for assessing and monitoring forest biodiversity, evaluation of practices, planting and silvicultural treatments, and management and monitoring methods, with an overall</p>

goal to provide new insights on forest biodiversity conservation, conservation of forest biodiversity in protected areas, treatments of endangered or threatened forest habitats, and sustainable management of forest resources.

3. Record Nr.	UNINA9910969681003321
Autore	Sophocles
Titolo	Oedipus the king // Sophocles ; translated by Stephen Berg and Diskin Clay
Pubbl/distr/stampa	New York, : Oxford University Press, 1988

Sommario/riassunto	Based on the conviction that only translators who write poetry themselves can properly recreate the celebrated and timeless tragedies of Aeschylus, Sophocles, and Euripides, the Greek Tragedy in New Translations series offers new translations that go beyond the literal meaning of the Greek in order to evoke the sense of poetry evident in the originals. Under the editorship of Peter Burian and Alan Shapiro, each volume includes a critical introduction, commentary on difficult passages, ample stage directions, and a glossary of the mythical names and geographical references encountered in the di
