

1. Record Nr.	UNINA9910872634703321
Titolo	Computer Security Foundations Workshop VI
Pubbl/distr/stampa	[Place of publication not identified], : IEEE Computer Society Press, 1993
Descrizione fisica	1 online resource (224 pages)
Disciplina	005.8
Soggetti	Computer security
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	<p>The purpose of the annual Computer Security Foundations Workshop is to bring together researchers to explore fundamental issues in computer security. The emphasis is on formal models that provide a framework for theories of security, and techniques for verifying security as defined by these theories. This volume contains papers presented at the June 1993 Workshop held in Franconia, New Hampshire, as well as position papers for the panels. Topics include covert channel analysis, information flow, integrity and aggregation, access control, and crypto protocol analysis. No index. Annotation copyright by Book News, Inc., Portland, OR.</p>
