

1. Record Nr.	UNINA9910872682903321
Titolo	2000 Frontiers in Education 30th Annual Conference
Pubbl/distr/stampa	[Place of publication not identified], : I E E E, 2001
Descrizione fisica	1 online resource
Disciplina	607.1
Soggetti	Engineering - Study and teaching
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	<p>We describe usage patterns of a design information database, and discuss issues of learning and knowledge sharing through socially and technologically mediated interactions in a product design community. In the five years spanning 1994 to 1999, a database of captured design information was made available to students in a graduate level project course at Stanford University. A large amount of database access data was analyzed to discover usage patterns concerning the issue of learning from experience of peers, past and present. The results from quantitative analysis of database access log were augmented by qualitative user interviews, in which several important social issues around the usage of such peer learning systems were exposed.</p>
