

1. Record Nr.	UNINA9910872708903321
Titolo	1993 Software Engineering Standards Symposium, August 30 - September 3, 1993, Brighton, United Kingdom : proceedings
Pubbl/distr/stampa	[Place of publication not identified], : IEEE Computer Society Press, 1993
Descrizione fisica	1 online resource
Disciplina	005.1
Soggetti	Software engineering - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Safety assessment test for automated ground transportation systems' software -- AUSTERE: a system for AUtomed STandard softwarE REview -- Bridging the gap between CASE and CAST -- Automated tool support for ANSI/IEEE STD: 829-1983 software test documentation -- Specifying quality requirements in a formally defined language standard -- Quality standards: the role of Software Process Assessments -- A practitioner's guide to evaluation of software -- An attempt to increase software quality by detecting irregular styles -- Knowledge-based system for assembly process-planning -- Status of repository standards for software engineering.
