1. Record Nr.   UNINA9910872842003321

   Titolo   6th IEEE Symposium on Computers and Communications, 2001
                       Hammamet, Tunisia

   Pubbl/distr/stampa [Place of publication not identified], : IEEE Computer Society Press,
                       2001

   Descrizione fisica 1 online resource (754 pages)

   Disciplina   004.6

   Soggetti   Computer networks
                       Data transmission systems
                       Telecommunication - Data processing

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Sommario/riassunto Papers from a July 2001 symposium shed light on practical problems
                       related to the design, deployment, and use of information and
                       networking systems. They are presented in sections on security and
                       authentication, World Wide Web and distributed systems, multicast
                       communications, optimization of wireless networks, ATM traffic
                       analysis, quality of service, MPLS and routing, packet video
                       communications, and packet voice. Other topics include satellite
                       communications, network management and traffic scheduling, mobile
                       IP, mobile architecture, quality of service in wireless networks, channel
                       coding, performance analysis of wireless networks, access protocols
                       and LANs, testing and formal verification, electronic commerce systems
                       and software, and TCP/IP issues. This volume lacks a subject index. c.
