

1. Record Nr.	UNINA9910872868103321
Titolo	Euromicro '97 Conference: New Frontiers of Information Technology
Pubbl/distr/stampa	[Place of publication not identified], : I E E E Imprint, 1998
Descrizione fisica	1 online resource
Disciplina	004.16
Soggetti	Microcomputers Microcomputers - Design and construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Proceedings 23rd Euromicro Conference New Frontiers of Information Technology - Short Contributions -- Life-cycle for formal object-oriented specification models -- A mathematical programming method in test selection -- To SPIRE or not to SPIRE-that is the question! -- Prototyping with attribute grammars and Prolog -- Systematic development of industrial control systems using software/hardware engineering -- An application sharing object and behavior for collaboration based system -- A deadlock detection/resolution algorithm for the OR model -- Vector-based analysis of motor activities in patients with Parkinson's disease -- A classification approach to image structure segmentation based on the wavelet transform.
