

1. Record Nr.	UNINA9910872997103321
Titolo	Document Analysis and Recognition, 3rd International Conference (ICDAR '95)
Pubbl/distr/stampa	[Place of publication not identified], : IEEE Computer Society Press, 1995
Descrizione fisica	1 online resource
Disciplina	621.367
Soggetti	Image processing Optical character recognition
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	International Conference On Document Analysis and Recognition -- Bibliography references validation using emergent architecture -- A framework for validating recognized results in understanding table-form document images -- Zone classification in a document using the method of feature vector generation -- The "Narrative Knowledge Representation Language", a knowledge-based approach for representing the "meaning" of textual documents -- READLEX: a lexicon for the recognition and analysis of structured documents -- A knowledge-based approach to Chinese archive document understanding -- Contextual postprocessing of a Korean OCR system by linguistic constraints -- Classification and functional decomposition of business documents -- A new approach to document analysis based on modified fractal signature.
