

1. Record Nr.	UNINA9910873833403321
Titolo	ITG-Fb. 289: Smart SysTech 2019 : European Conference on Smart Objects, Systems and Technologies June 04- 05, 2019, Fraunhofer Institute for Factory Operation and Automation IFF Magdeburg, Germany
Pubbl/distr/stampa	Berlin, : VDE Verlag, 2019
ISBN	1-5231-3052-0 3-8007-4978-5
Edizione	[Neuerscheinung]
Descrizione fisica	Online-Ressource (128 S.)
Collana	ITG-Fachberichte
Soggetti	Network Measurement System Design Smart Production Smart Object Smart System Smart Technology System Architecture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	PublicationDate: 20190606
Sommario/riassunto	Long description: Over the last 10 years, the European Workshop on RFID Systems and Technologies (RFID SysTech) had become a central platform in Europe for personal networking and information exchange in the field of smart object technologies and applications. Based on this great success we are proud to announce the 8th Smart SysTech - European Conference on Smart Objects, Systems and Technologies to be held in Magdeburg from June 4th to June 5th, 2019. This change is accompanied by an extension of our main topic. While RFID remains one of the cornerstones, we open the focus of the event. This is due to the fact that AutoID technologies and the Internet of Things have grown together to advanced networked Smart Objects technologies.
