A case study from Italy -- Creating a value driven entrepreneurship opportunity using design thinking and 'servitisation'.

Sommario/riassunto

This book provides a comprehensive overview, including critical aspects of and opportunities for effective sustainability management in today's unpredictable and fragile business landscapes. Presenting the outcomes of the 26th Excellence in Services International Conference, held in Paisely, UK, on August 31–September 1, 2023, the book brings together both selected research contributions and numerous best-practice examples in sustainability management. As such, it will help managers to improve their sustainability-related decision-making processes at various levels of the business ecosystem and integrate service excellence as a new way of thinking.
