

1. Record Nr.	UNINA9910874680703321
Titolo	Care of Adults with Chronic Childhood Conditions : A Practical Guide // edited by Alice A Kuo, Mariecel Pilapil, David E. DeLaet, Cynthia Peacock, Niraj Sharma
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2024
ISBN	3-031-54281-9
Edizione	[2nd ed. 2024.]
Descrizione fisica	1 online resource (825 pages)
Disciplina	616.044
Soggetti	Family medicine Primary care (Medicine) General Practice and Family Medicine Primary Care Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Defining Transition -- The overall landscape of transition -- Existing models of transition -- Telemedicine as tool to optimize transition care -- US Training Competencies related to transition -- Payment for transition services in US -- Emerging Adulthood as a Developmental Stage -- Health Care of Emerging Adults -- Addressing Emerging Adulthood During a Visit -- Using the HEADSS Assessment -- A Paradigm Shift for the Preventive Visit -- Well Care of the Emerging and Young Adult -- Care Management Skills -- USPSTF Recommendations -- Immunizations -- Telehealth -- Considerations for Emerging and Young Adults with Chronic Childhood Conditions -- PCMH and Billing -- Chronic Care Model -- Steps for caring for adults with COCC -- Sexual and Reproductive health -- Gender Identity and Related Health Considerations -- Sexual Abuse in Individuals with Intellectual Disability -- Care of Sexual and Gender Minority Patients -- Medical Care for Transgender and Gender-Diverse People -- Special Considerations of Emergency Preparedness -- Addressing structural racism -- Integrating Neurodiversity and Disability Rights into Primary Care Practices -- Managing Stress as an Emerging Adult -- Adverse Childhood Events and Trauma-Informed Care -- Transitions for Young

Adults with Psychosis and Mania -- Emerging Adulthood and Depression: An Overview of Chronic Illness and Treatment -- Managing OCD and Anxiety as Emerging Adults -- Substance Use Disorders -- College Mental Health Chronic pain -- Eating disorders -- Attention Deficit/Hyperactivity Disorder -- Autism -- Cerebral Palsy -- Childhood and Adolescent Cancer Survivors -- Congenital Heart Disease -- Cystic Fibrosis -- Transitioning Adolescents and Young Adults with Type 1 Diabetes to Adulthood -- Down Syndrome -- Human Immunodeficiency Virus -- Inflammatory Bowel Disease -- Intellectual Disability -- Juvenile Idiopathic Arthritis -- Muscular Dystrophy -- Sickle Cell Disease -- Solid Organ Transplantation -- Spina Bifida -- Inherited Metabolic Disorders -- Endocrine Disorders -- Respiratory Care of Adults with Chronic Pulmonary Disease and Assisted Ventilation -- Nutritional Support -- Technology Dependence of the Nervous System -- Mobility Impairment -- Palliative Care and Hospice -- Health Care Procedures -- Preoperative clearance -- Patient Safety for Hospitalized Young Adults and Adults with Chronic Childhood Conditions -- Institutional Considerations for Transitions of Care -- Inpatient Care of Adults with Conditions of Childhood -- Contact with Primary Care Providers -- Care in the Emergency Department -- In-Hospital Rapid Response and Clinical Emergencies -- Considerations for Hospitalized Adults with Chronic Childhood Conditions -- Assessing and Enhancing Psychosocial Functioning -- Adherence and Self-Management -- Education -- Employment -- Independent living -- Decision-making and Guardianship -- Access to Health Insurance.

Sommario/riassunto

This book addresses the unique healthcare needs of adults with chronic childhood illnesses. It presents a model of primary and secondary prevention for emerging adulthood: primary prevention, in which all young adults are screened for high-risk behaviors and health needs, and secondary prevention, in which young adults with chronic childhood conditions are optimized through coordinated care, connections to community resources and social/family support. Now in its revised and expanded second edition, this book is organized in seven parts. Part I provides a detailed overview of the health care transition from pediatrics to adult medicine from both a policy and practice perspective. New topics in this section include telemedicine as a tool to optimize transition care and systems of care/models of care that include practical steps on how to get transition/transfer done or care for these patients in the appropriate setting. In Part II, the concept of emerging adulthood as a developmental period is explored and strategies for providing improved comprehensive care for this age group are discussed. A section on addressing health maintenance has been added to this edition. Part III reviews specific chronic childhood conditions, such as attention-deficit/hyperactivity disorder, autism, cystic fibrosis, and diabetes mellitus, and offers clinical cases and summary reports that can be used as a quick guides to each condition. Several new conditions have been added to this section, including metabolic issues/conditions, eating disorders, transgender medicine and childhood endocrine conditions. Section IV is a completely new section that focuses on hospital medicine. Chapters within this section include pre-op clearance, maintaining safety, neurodiversity considerations, ER issues and triaging, emergencies, contact with PCP, adult issues not addressed, pediatric issues often overlooked, inpatient transition policies, procedures, Med-Peds/Transition, palliative care/hospice and unique inpatient cases. In Part V, additional clinical considerations that are not necessarily condition-specific but are highly relevant to the care of young adults with chronic childhood conditions

are examined. Part VI describes the socio-legal issues involved in caring for this population. Finally, part VII is another completely new section that focuses on public health and population considerations. Chapters in this section include telemedicine, disaster preparedness, quality improvement, health care services, mental health/psychiatry, neurodiversity and addressing equity and racism. Written by experts in the field, *Care of Adults with Chronic Childhood Conditions, 2e* provides primary care providers with a new framework for the care of young adults and identifies opportunities to influence patient health outcomes over a life trajectory.
