Sommario/riassunto	"Daniel Parolek, an architect and urban designer, illustrates the power of Missing Middle housing types--such as duplexes, fourplexes, and bungalow courts--to meet today's diverse housing needs. With the benefit of beautiful full-color graphics, Parolek goes into depth about the benefits and qualities of Missing Middle Housing, explains why more developers should be building them, and defines the barriers cities need to remove to enable them to be built. Parolek proves that density is too blunt of an instrument to effectively regulate for twenty-first-century housing needs. Whether you are a planner, architect, builder, or city leader, Missing Middle Housing will help you think differently about how to address housing needs for today's communities"--

Sommario/riassunto	<p>This book is the first comprehensive analysis of trade between Poland and Arab countries in the interwar period. The main source material is archives, which are the legacy of the activity of Polish diplomatic establishments, consular institutions and the Ministry of Foreign Affairs. In the first place, the reader is introduced to the situation of reborn Poland and the evolution of its trade relations with foreign countries. At the same time, a new geopolitical system in the Arab world was presented that had been created after the collapse of the Ottoman Empire. Then, the book has a geographical layout, referring first to the countries of North Africa, and then to the Middle East. The first subchapters of the main part refer to the economic characteristics of a given Arab country and its foreign trade and customs tariff. The next part concerns Polish exports to a given Arab country broken down by the 1920's and the 1930's. This division allowed to show the dynamics of the trade turnover and the impact of the Great Depression on mutual exchange. Subsequently, imports to Poland are characterized. The next subchapters analyse the issues of bilateral communication, mixed chambers of commerce and the impact of trade</p>

fairs on the development of cooperation. At the end of each chapter, the author raises an issue of the conditions and balance of mutual trade. The book ends with a comprehensive summary that relates globally to the problem.
