The Great Transformation of the Transport Sector -- 5.1 Placing People at the Centre of Sustainable Transport Development -- 5.2 Breaking with the Growth Paradigm as a Prerequisite for PeopleCentred Transport Development -- 5.3 The Common Good as the Starting Point for a New Transport Policy -- 5.3.1 On the Relationship between the Common Good and Transport -- 5.3.2 The Mobility Act -- 5.3.3 Summary -- 5.4 Fourth Interim Summary - It's the Politics, Stupid! -- Conclusion -- Bibliography.

Sommario/riassunto

Transport is the only sector that has not yet contributed to the reduction of carbon dioxide emissions. To understand why sustainable transport has not been developed yet, Oliver Schwedes highlights the special features of the transport sector and describes the political conditions for a successful change in transport development. He makes clear that technical innovations alone will not be enough; rather, transport policy must be practised as social policy.
