

1. Record Nr.	UNINA9910875656703321
Autore	Noto La Diega Guido
Titolo	Chapter 6 The Internet of Things (You Don't Own) under Bourgeois Law
Pubbl/distr/stampa	Taylor & Francis
Disciplina	343.09/99
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>"Internet of Things and the Law: Legal Strategies for Consumer-Centric Smart Technologies is the most comprehensive and up-to-date analysis of the legal issues in the Internet of Things (IoT). For decades, the decreasing importance of tangible wealth and power - and the corresponding increasing significance of their disembodied counterparts - has been the subject of much legal analysis. For some time now, legal scholars have grappled with how laws drafted for tangible property and pre-digital offline technologies can cope with dematerialisation, digitalisation, and the internet. As dematerialisation continues, this book aims to illuminate the opposite movement: re-materialisation, namely the return of data, knowledge, and power within a physical smart world. This move frames the books central question: can the law steer re-materialisation in a human-centric and societally beneficial direction? To answer it, the book focuses on the IoT, the socio-technological phenomenon that is primarily responsible for this shift. After a thorough analysis of how existing laws can be interpreted to empower IoT end-users, Noto La Diega leaves us with the fundamental question of what happens when the law fails us and concludes with a call for collective resistance against smart capitalism"</p> <p>--</p>
