

1. Record Nr.	UNINA9910876760903321
Autore	Rousseeuw Peter J
Titolo	Robust regression and outlier detection [[electronic resource] /] / Peter J. Rousseeuw, Annick M. Leroy
Pubbl/distr/stampa	New York, : Wiley, c1987
ISBN	1-280-25303-7 9786610253036 0-471-72537-4 0-471-72538-2
Descrizione fisica	1 online resource (354 p.)
Collana	Wiley series in probability and mathematical statistics. Applied probability and statistics, , 0271-6356
Altri autori (Persone)	LeroyAnnick M
Disciplina	519.5/36
Soggetti	Least squares Outliers (Statistics) Regression analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Robust Regression and Outlier Detection; Contents; 1. Introduction; 2. Simple Regression; 3. Multiple Regression; 4. The Special Case of One-Dimensional Location; 5. Algorithms; 6. Outlier Diagnostics; 7. Related Statistical Techniques; References; Table of Data Sets; Index;
Sommario/riassunto	Provides an applications-oriented introduction to robust regression and outlier detection, emphasising °high-breakdown° methods which can cope with a sizeable fraction of contamination. Its self-contained treatment allows readers to skip the mathematical material which is concentrated in a few sections.
