1.	Record Nr.	UNINA9910876774403321
	Titolo	Handbook of graphs and networks : from the Genome to the Internet / / Stefan Bornholdt, Heinz Georg Schuster (eds.)
	Pubbl/distr/stampa	Weinheim ; ; [Cambridge], : Wiley-VCH, c2003
	ISBN	1-280-52099-X 9786610520992 3-527-60633-5 3-527-60275-5
	Edizione	[1st ed.]
	Descrizione fisica	1 online resource (419 p.)
	Altri autori (Persone)	BornholdtStefan SchusterHeinz Georg <1943->
	Disciplina	003 511.5
	Soggetti	System analysis Graph theory Combinatorial analysis
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Handbook of Graphs and Networks From the Genome to the Internet; Preface; Contents; List of contributors; 1 Mathematical results on scale-free random graphs; 1.1 Introduction; 1.2 Classical models of random graphs; 1.3 Results for classical random graphs; 1.4 The Watts-Strogatz 'small-world' model; 1.5 Scale-free models; 1.6 The Barabasi-Albert model; 1.7 The LCD model and $G((n))(m)$; 1.8 The Buckley-Osthus model; 1.9 The copying model; 1.10 The Cooper-Frieze model; 1.11 Directed scale-free graphs; 1.12 Clustering coefficient and small subgraphs 1.13 Pairings on [0, 1] and the diameter of the LCD model1.14 Robustness and vulnerability; 1.15 The case [0, 1]: plane-oriented recursive trees; 1.16 Conclusion; References; 2 Random graphs as models of networks; 2.1 Introduction; 2.2 Random graphs with specified degree distributions; 2.3 Probability generating functions; 2.3.1 Properties of generating functions; 2.3.2 Examples; 2.4 Properties of undirected graphs; 2.4.1 Distribution of component sizes; 2.4.2

Sommario/riassunto	Complex interacting networks are observed in systems from such diverse areas as physics, biology, economics, ecology, and computer science. For example, economic or social interactions often organize themselves in complex network structures. Similar phenomena are observed in traffic flow and in communication networks as the internet. In current problems of the Biosciences, prominent examples are protein networks in the living cell, as well as molecular networks in the genome. On larger scales one finds networks of cells as in neural networks, up to the scale of organisms in ecological food web
