

1. Record Nr.	UNINA9910876784203321
Autore	Cui Wenguo
Titolo	Natural Polymers for Biomedical Applications
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2024 ©2024
ISBN	3-527-84558-5 3-527-84557-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (218 pages)
Altri autori (Persone)	XiangLei
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Graphical Abstract -- Foreword -- Preface -- Acknowledgments -- Section I Historical Review of the Development of Natural Polymers -- References -- Section II Polysaccharides for Biomedical Application -- Chapter 1 Sources, Structures, and Properties of Alginate -- 1.1 AlginateBased Hydrogel for Biomedical Application -- 1.1.1 Drug and Cell Delivery -- 1.1.2 Cell and Organoid Culture -- 1.1.3 Tissue Regeneration -- 1.1.4 Other Applications -- 1.2 AlginateBased Electrospinning for Biomedical Application -- 1.2.1 Drug Delivery -- 1.2.2 Tissue Regeneration -- 1.3 AlginateBased 3D Printing for Biomedical Application -- 1.3.1 Alginate Based BioInk and Printing Strategies Improvement -- 1.3.2 Attempts at Bionic Matrix Ink -- References -- Chapter 2 Sources, Structures, and Properties of Cellulose -- 2.1 CelluloseBased Hydrogel for Biomedical Application -- 2.1.1 Drug Delivery -- 2.1.2 Cell and Organoid Culture -- 2.1.3 Tissue Regeneration -- 2.2 CelluloseBased Electrospinning for Biomedical Application -- 2.2.1 Drug Delivery -- 2.2.2 Antibacterial -- 2.2.3 Tissue Regeneration -- 2.3 CelluloseBased 3D Printing for Biomedical Application -- 2.3.1 Improvement of BioInk -- 2.3.2 Bacteria and Cell Culture -- References -- Chapter 3 Sources, Structures, and Properties of Hyaluronic Acid -- 3.1 HyaluronicAcid Based Hydrogel for Biomedical Application -- 3.1.1 Cell and Organoids Culture -- 3.1.2 Cell Behaviors Regulation -- 3.1.3 Drug Delivery --

3.1.4 Tissue Regeneration -- 3.2 HyaluronicAcidBased Electrospinning for Biomedical Application -- 3.2.1 Drug Delivery and Antibacterial -- 3.2.2 Tissue Regeneration -- 3.3 HyaluronicAcidBased 3D Printing for Biomedical Application -- 3.3.1 Cell and Organoid Culture -- 3.3.2 Tissue Regeneration -- References.

Chapter 4 Sources, Structures, and Properties of Chitosan -- 4.1 ChitosanBased Hydrogel for Biomedical Application -- 4.1.1 Cell and Organoid Culture -- 4.1.2 Tissue Regeneration -- 4.2 ChitosanBased Electrospinning for Biomedical Application -- 4.2.1 Drug and Cell Delivery -- 4.2.2 Tissue Regeneration -- 4.3 ChitosanBased 3D Printing for Biomedical Application -- 4.3.1 Cell Behavior Regulation -- 4.3.2 Drug Delivery -- 4.3.3 Tissue Regeneration -- References --

Chapter 5 Sources, Structures, and Properties of Other Polysaccharides -- 5.1 Other PolysaccharidesBased Hydrogel for Biomedical Application -- 5.1.1 Drug Delivery -- 5.1.2 Cell and Organoid Culture -- 5.1.3 Tissue Regeneration -- 5.2 Other PolysaccharidesBased Electrospinning for Biomedical Application -- 5.2.1 Drug Delivery -- 5.2.2 Tissue Regeneration -- 5.3 Other Polysaccharides 3D Printing for Biomedical Application -- 5.3.1 Drug Delivery -- 5.3.2 Tissue Regeneration -- References --

Chapter 6 Summary -- Section III Polypeptides for Biomedical Application -- Chapter 7 Sources, Structures, and Properties of Collagen -- 7.1 CollagenBased Hydrogel for Biomedical Application -- 7.1.1 Drug Delivery -- 7.1.2 Cell and Organoid Culture -- 7.1.3 Cell Behavior Regulation -- 7.1.4 Tissue Regeneration -- 7.2 CollagenBased Electrospinning for Biomedical Application -- 7.2.1 Cell and Organoid Culture -- 7.2.2 Tissue Regeneration -- 7.3 CollagenBased 3D Printing for Biomedical Application -- 7.3.1 Tissue Regeneration -- References --

Chapter 8 Sources, Structures, and Properties of Gelatin -- 8.1 GelatinBased Hydrogel for Biomedical Application -- 8.1.1 Cell Culture and Behavior Regulation -- 8.1.2 Drug Delivery -- 8.1.3 Tissue Regeneration -- 8.2 GelatinBased Electrospinning for Biomedical Application -- 8.2.1 Cell Culture -- 8.2.2 Tissue Regeneration.

8.3 GelatinBased 3D Printing for Biomedical Application -- 8.3.1 Tissue Regeneration -- References --

Chapter 9 Sources, Structures, and Properties of Silk Fibroin -- 9.1 SilkFibroinBased Hydrogel for Biomedical Application -- 9.1.1 Drug Delivery and Cell Culture -- 9.1.2 Tissue Regeneration -- 9.2 SilkFibroinBased Electrospinning for Biomedical Application -- 9.2.1 Drug Delivery and Antibacterial -- 9.2.2 Tissue Regeneration -- 9.3 SilkFibroinBased 3D Printing for Biomedical Application -- 9.3.1 Tissue Regeneration -- References --

Chapter 10 Sources, Structures, and Properties of Other Polypeptides -- 10.1 Other PolypeptidesBased Hydrogel for Biomedical Application -- 10.1.1 Cell Culture and Delivery -- 10.1.2 Tissue Engineering and Drug Delivery -- 10.2 Other PolypeptidesBased Electrospinning for Biomedical Application -- 10.2.1 Drug Delivery -- 10.2.2 Tissue Regeneration -- 10.3 Other PolypeptidesBased 3D Printing for Biomedical Application -- 10.3.1 Cell and Organoid Culture -- 10.3.2 Tissue Regeneration -- References --

Chapter 11 Summary -- Section IV Other Kinds of Natural Polymers for Biomedical Application -- Chapter 12 Sources, Structures, and Properties of Catechins -- 12.1 CatechinsBased Hydrogel for Biomedical Application -- 12.2 CatechinsBased Electrospinning for Biomedical Application -- 12.3 Catechins-Metal Complexes for Biomedical Application -- References --

Chapter 13 Sources, Structures, and Properties of Quercetin -- 13.1 QuercetinBased Hydrogel for Biomedical Application -- 13.2 Quercetin Based Electrospinning for Biomedical Application -- 13.3 Quercetin-Metal Complexes for Biomedical Application -- References -- Chapter

14 Sources, Structures, and Properties of Resveratrol -- 14.1  
ResveratrolBased Hydrogel for Biomedical Application -- 14.2  
ResveratrolBased Electrospinning for Biomedical Application.  
14.3 Resveratrol-Metal Complexes for Biomedical Application --  
References -- Chapter 15 Sources, Structures, and Properties of  
Curcumin -- 15.1 CurcuminBased Hydrogel for Biomedical Application  
-- 15.2 CurcuminBased Electrospinning for Biomedical Application --  
15.3 Curcumin-Metal Complexes for Biomedical Application --  
References -- Chapter 16 Summary -- References -- Chapter 17  
Conclusion and Outlook -- References -- Declaration of Competing  
Interest -- Nomenclature -- Index -- EULA.
