1. Record Nr. UNINA9910876826103321

Autore	Smith C. U. M (Christopher Upham Murray)
Titolo	Elements of molecular neurobiology / / C.U.M. Smith
Pubbl/distr/stampa	Chichester, : Wiley, 2002
ISBN	0-470-85717-X 1-280-27071-3 9786610270712 0-470-85749-8
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (635 p.)
Disciplina	573.848 599/.0188
Soggetti	Molecular neurobiology Neurobiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previous ed.: 1996.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Elements of Molecular Neurobiology Third Edition; CONTENTS; Preface; Preface to the First Edition; Preface to the Second Edition; 1 Introductory Orientation; 2 The Conformation of Informational Macromolecules; 3 Information Processing in Cells; 4 Molecular Evolution; 5 Manipulating Biomolecules; 6 Genomics; 7 Biomembranes; 8 G-protein-coupled Receptors; 9 Pumps; 10 Ligand-gated Ion Channels; 11 Voltage-gated Channels; 12 Resting Potentials and Cable Conduction; 13 Sensory Transduction; 14 The Action Potential; 15 The Neuron as a Secretory Cell; 16 Neurotransmitters and Neuromodulators 17 The Postsynaptic Cell18 Developmental Genetics of the Brain; 19 Epigenetics of the Brain; 20 Memory; 21 Some Pathologies; Appendix 1 Molecules and Consciousness; Appendix 2 Units; Appendix 3 Data; Appendix 4 Genes; Appendix 5 Physical Models of Ion Conduction and Gating; Acronyms and Abbreviations; Glossary; Bibliography; Index of Neurological Disease; Index;
Sommario/riassunto	This thoroughly revised and updated new edition of C.U.M. Smith's 1996 text gives an account of the molecular biology of the brain as it stands at the beginning of the twenty-first century. It describes the latest research in neurobiology made possible by modern molecular

biology techniques. The author synthesizes this new knowledge and demonstrates how an understanding at the molecular level can contribute towards a theory of the brain in health and disease.
