

1. Record Nr.	UNINA9910876870803321
Autore	Zollinger Heinrich <1919->
Titolo	Diazo chemistry II : aliphatic, inorganic, and organometallic compounds // Heinrich Zollinger [[electronic resource]]
Pubbl/distr/stampa	New York, : VCH, c1995
ISBN	1-280-55868-7 9786610558681 3-527-60173-2
Descrizione fisica	1 online resource (xiii, 522 p.) : ill. ;
Collana	Diazo Chemistry (VCH)
Disciplina	547/.043
Soggetti	Diazo compounds
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [459]-506) and index.
Nota di contenuto	v. 1. Aromatic and heteroaromatic compounds -- v. 2. Aliphatic, inorganic, and organometallic compounds.
Sommario/riassunto	Diazo compounds play an important role as reaction intermediates and reagents in organic synthesis. This book is a critical, well- referenced and eminently readable introduction to the chemistry of aliphatic, inorganic and organometallic diazo compounds. It provides well-researched information that could otherwise be obtained only by costly and time-consuming searches of multi-volume treatises and the original literature.; Topics covered in depth include: - preparation and structure of diazo compounds - kinetics and mechanism of diazotizations - reactions of diazo compounds - applications in organic synthesis - metal complexes with diazonium and diazo compounds Many tables and reaction schemes as well as copious literature citations make this book a highly valuable reference work for synthetic organic chemists, inorganic chemists, organometallic chemists and industrial chemists.; Already available: Volume 1 of Diazo Chemistry covering aromatic and heteroaromatic compounds.
