Sommario/riassunto

Diabetic Foot Care: Case Studies in Clinical Management uses a 100% illustrated patient case study format to demonstrate the multidisciplinary care and clinical management of patients with feet and lower limb problems as a result of diabetes. Every case has colour illustrations highlighting both the initial presentation of the foot, right through to treatment and long term follow-up care. Of particular focus are the management problems, barriers to effective care, preventable mistakes, unnecessary delays in presentations, challenging situations, conflicts, dilemmas and solutions that po
