

1. Record Nr.	UNINA9910877158103321
Titolo	T cell subsets in infectious and autoimmune diseases
Pubbl/distr/stampa	Chichester ; ; New York, : Wiley, 1995
ISBN	1-282-34794-2 9786612347948 0-470-51484-1 0-470-51485-X
Descrizione fisica	1 online resource (274 p.)
Collana	Ciba Foundation symposium ; ; 195
Altri autori (Persone)	ChadwickDerek CardewGail
Disciplina	616.9/0479
Soggetti	T cells Immunopathology Communicable diseases - Immunological aspects Autoimmune diseases - Immunological aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Editors: Derek Chadwick (Organizer) and Gail Cardew"--p. v. Based on a symposium held at the Ciba Foundation, London 7-9 March, 1995.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	T CELL SUBSETS IN INFECTIOUS AND AUTOIMMUNE DISEASES; Contents; Participants; Introduction; Differentiation and tolerance of CD4+ T lymphocytes; Reversal of polarized T helper 1 and T helper 2 cell populations in murine leishmaniasis; General discussion I; Differentiation of subsets of CD4+ and CD8+ T cells; Role for CD30 antigen in human T helper 2-type responses; Regulation of T lymphocyte subsets; General discussion II; Induction and regulation of host cell-mediated immunity by Toxoplasma gondii; The development of effector T cell subsets in murine Leishmania major infection T cells and cytokines in intracellular bacterial infections: experiences with Mycobacterium bovis BCGGeneral discussion III; Cytokines in immune regulation/ pathogenesis in HIV infection; Regulation of CD4+ T cell differentiation1; The role of subsets of CD4+ T cells in autoimmunity1; Signalling events in the anergy induction of T helper 1 cells1; The two faces of interleukin 12: a pro-inflammatory cytokine

and a key immunoregulatory molecule produced by antigen-presenting cells; Interleukin 15 and its receptor; Nitric oxide in infectious and autoimmune diseases; Final discussion

**Sommario/riassunto**

T cells are a specialized population of immune cells that aid the immune system in combating various types of invading pathogens. This book presents up-to-the-minute data on the role of T cells in autoimmune diseases.
