

1. Record Nr.	UNINA9910877325403321
Titolo	Zeolites in industrial separation and catalysis // edited by Santi Kulprathipanja
Pubbl/distr/stampa	Weinheim, : Wiley-VCH Verlag GmbH & Co., 2010
ISBN	1-282-48270-X 9786612482700 3-527-62956-4 3-527-62957-2
Descrizione fisica	1 online resource (619 p.)
Altri autori (Persone)	KulprathipanjaSanti
Disciplina	660.2995
Soggetti	Zeolites Separation (Technology) Catalysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Zeolites in Industrial Separation and Catalysis; Contents; Preface; List of Contributors; 1: Introduction; 1.1 Introduction; 1.1.1 Molecular Sieves and Zeolites; 1.1.2 Nomenclature; 1.1.3 Early History; 1.1.4 Natural Zeolites; 1.2 History of Molecular Sieve Materials; 1.2.1 Aluminosilicate Zeolites and Silica Molecular Sieves; 1.2.2 The Materials Explosion Since the 1980s; 1.2.2.1 The 1980s; 1.2.2.2 The 1990s; 1.2.2.3 The New Millennium; 1.3 Synthesis; 1.4 Applications; 1.5 Markets; 1.6 The Future; 1.6.1 Materials; 1.6.2 Applications; 1.7 History of International Conferences and Organizations 1.8 Historical EpilogReferences; Further Reading; 2: Zeolite Types and Structures; 2.1 Introduction; 2.2 Building Units for Zeolite Frameworks; 2.3 Zeolite Framework Types; 2.4 Pores, Channels, Cages and Cavities; 2.5 Materials Versus Framework Types; 2.6 Structures of Commercially Significant Zeolites; 2.6.1 Linde Type A (LTA); 2.6.2 Faujasite (FAU); 2.6.3 Mordenite (MOR); 2.6.4 Chabazite (CHA); 2.6.5 ZSM-5 (MFI); 2.6.6 Linde Type L (LTL); 2.6.7 Beta Polymorphs *BEA and BEC; 2.6.8 MCM-22 (MWW); 2.7 Hypothetical Zeolite Frameworks; Acknowledgments; References

3: Synthesis of Zeolites and Manufacture of Zeolitic Catalysts and Adsorbents  
3.1 Introduction; 3.2 Synthesis of Zeolites and Aluminophosphate Molecular Sieves; 3.2.1 Hydrothermal Synthesis-The Key to Metastable Phases; 3.2.2 Typical Zeolite Syntheses; 3.2.3 Important Synthesis Parameters-Zeolites; 3.2.4 Typical Aluminophosphate Syntheses; 3.2.5 Important Synthesis Parameters-Aluminophosphates; 3.2.6 Dewatering, Filtration and Washing of Molecular Sieve Products; 3.3 Forming Zeolite Powders into Usable Shapes; 3.3.1 Chemical Engineering Considerations in Zeolite Forming 3.3.2 Ceramic Engineering Considerations in Zeolite Forming 3.3.3 Bound Zeolite Forms; 3.3.4 Other Zeolite Forms-Colloids, Sheets, Films and Fibers; 3.4 Finishing: Post-Forming Manufacturing of Zeolite Catalysts and Adsorbents; 3.4.1 Post-Forming Crystallization; 3.4.2 Stabilization and Chemical Modification of Zeolites; 3.4.3 Ion Exchange and Impregnation; 3.4.4 Drying and Firing; 3.5 Selected New Developments in Catalyst and Adsorbent Manufacture; References; 4: Zeolite Characterization; 4.1 Introduction; 4.1.1 Importance of Characterization; 4.2 Multi-Technique Methodology 4.2.1 Identification of the Structure of a Newly Invented Zeolite 4.3 X-Ray Powder Diffraction Characterization of Zeolitic Systems; 4.3.1 Interpretation of Powder Diffraction Data for Zeolites; 4.3.2 Phase Identification and Quantification; 4.3.3 Unit Cell Size Determination; 4.3.4 Crystallite Size; 4.3.5 Rietveld Refinement; 4.4 Electron Microscopy Characterization of Zeolitic Systems; 4.4.1 Importance of Electron Microscopy for Characterizing Zeolites; 4.4.2 Scanning Electron Microscopy; 4.4.2.1 Morphological Characterization; 4.4.2.2 Compositional Characterization 4.4.3 Transmission Electron Microscopy

---

Sommario/riassunto

This first book to offer a practical overview of zeolites and their commercial applications provides a practical examination of zeolites in three capacities. Edited by a globally recognized and acclaimed leader in the field with contributions from major industry experts, this handbook and ready reference introduces such novel separators as zeolite membranes and mixed matrix membranes. The first part of the book discusses the history and chemistry of zeolites, while the second section focuses on separation processes. The third and final section treats zeolites in the field of catalysis. T
