Pubbl/distr/stampa	New York, : Wiley, 2002
ISBN	9786610554874 0-470-35358-9 0-470-84634-8 1-280-55487-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (x, 177 p.) : ill. ;
Disciplina	362.1/028
Soggetti	Telecommunication in medicine Telemedicine Delivery of Health Care - methods Telecommunications Medicine Delivery of Health Care Patient Care Management Communications Media Health Occupations Health Services Administration Information Science Health Care Medicine - General Health & Biological Sciences Computer network resources. Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. [155]-170) and index.
Sommario/riassunto	Rapid advancement of telecommunications and information technology has created the potential for high-quality expert healthcare to be

delivered when and where it is needed. This text charts the development of the telemedicine industry, defines its current scope and reveals the potential of new methodologies.* explains the main features of telemedicine and telecare* reviews the technology needed for telemedicine* describes how to develop, deliver and evaluate telemedicine services* considers the associated ethical and legal issues* includes an in-depth survey of the literature with over 300 references to research articles and hyperlinks to associated websitesThis text provides a good working knowledge of the subject matter. It will be indispensable for all students on courses related to medicine and health care management. It also addresses the strategic, technical and operational issues faced by clinicians and healthcare managers considering the introduction of telemedicine services offering solutions for a variety of situations.
