

1. Record Nr.	UNINA9910878052203321
Autore	Gervasi Osvaldo
Titolo	Computational Science and Its Applications – ICCSA 2024 Workshops : Hanoi, Vietnam, July 1–4, 2024, Proceedings, Part III // edited by Osvaldo Gervasi, Beniamino Murgante, Chiara Garau, David Taniar, Ana Maria A. C. Rocha, Maria Noelia Faginas Lago
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031652387 303165238X
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (473 pages)
Collana	Lecture Notes in Computer Science, , 1611-3349 ; ; 14817
Altri autori (Persone)	MurganteBeniamino GarauChiara TaniarDavid C. RochaAna Maria A Faginas LagoMaria Noelia
Disciplina	004.6
Soggetti	Computer networks Computer science Computer engineering Artificial intelligence Computer systems Computer Communication Networks Computer Science Computer Engineering and Networks Artificial Intelligence Computer System Implementation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Welcome Message from Organizers -- Organization -- Plenary Lectures -- Harnessing Artificial Intelligence for Enhanced Spatial Analysis of Natural Hazard Assessments -- Software Engineering Research in a New Situation -- Interpretability and Privacy Preservation in Large Language Models (LLMs) -- Contents - Part III -- Cities, Technologies and Planning (CTP 2024) -- Understanding Climate

Change in Alpine Region Through Geo-Referenced Multi-factor Mapping of Ski Facilities and Over-Tourism -- 1 Mountain Mass Tourism and Anthropization -- 1.1 Geo-Referenced Mapping of Italian Mountain Ski Areas -- 1.2 Results -- 1.3 Evaluation -- 1.4 Possible Developments and Implementations -- References -- Methodological Approach for Classifying Typical Recurrent Urban and Peri-Urban Configurations -- 1 Introduction -- 2 Materials and Methods -- 2.1 Materials and Methods to Select and to Isolate Configurations -- 2.2 Interpretation of Urban and Peri-Urban Configurations -- 3 Results -- 4 Discussion -- 5 Conclusions -- References -- Renewables Energy Communities to Restore the City/Country Relationship: The Case of San Severo in the Apulia Region (Italy) -- 1 Introduction -- 2 The Regulatory Framework -- 2.1 Multifunctionality, Climate and Energy in the Common Agricultural Policy -- 2.2 Energy-Climate Challenges and the Current Regulatory Framework -- 3 The Agro-Urban Park Between Spatial Government and Energy Policies: A Case Study -- 3.1 Study Area -- 3.2 Land-Energy Relationship -- 3.3 Energy Balance at Municipal Level -- 3.4 The Project Scenario: The Agro-Urban Park -- 4 Conclusion -- References -- Potential of the 15-Minute Peripheral City: Identifying Main Streets and Population Within Walking Distance -- 1 Introduction -- 2 Main Streets Through Continuity -- 3 Morphological Indicators -- 4 Dwellings Estimation. 5 Catchment Areas and Population Potentials -- 6 Catchment Areas and Population Potentials -- Appendix 1 -- Appendix 2 -- References -- The Spatial Roots of Urban Growth: Modelling Urban Dynamics with Space Syntax -- 1 Introduction -- 2 Concepts, Datasets and Methods -- 2.1 Case Study -- 2.2 Datasets and Methodology -- 3 Results and Discussion -- 3.1 Urban Scale Analysis -- 3.2 Neighbourhood Scale Analysis: Santa Maria -- 3.3 Urban vs Neighbourhood Scale: A Brief Comparison -- 4 Concluding Remarks -- References -- Public Participation in the 15-Minute City. The Role of ICT and Accessibility to Reduce Social Conflicts -- 1 Introduction -- 2 Literature Review -- 3 Data and Methodology -- 4 Results and Discussions -- 5 Conclusions -- References -- Downscaling Strategic EU Policy Directions in Mediterranean Cities: Participatory Assessment of Critical Issues and Barriers -- 1 Introduction -- 2 Data and Methodology -- 2.1 Stage I - Structure and Audience of the Questionnaire -- 2.2 Stage II - Focus Group Discussion -- 3 Qualitative Results -- 3.1 Stage I - Gathering Distributed Knowledge Through the Questionnaire -- 3.2 Stage II - Results of the Focus Group Workshop -- 3.3 Summarizing Results of Stage I and II -- 4 Discussion and Conclusions -- References -- Communal Resilience Framework -- 1 Introduction -- 2 Resilience: Contemporary State of Knowledge -- 2.1 Resilience as a Popular and Trending Multidimensional Concept -- 2.2 Resilience in Public Administration and Local Governance -- 3 Methods -- 4 Results -- 4.1 Strengthening of Energy Independence -- 4.2 Digitalization and Circular Economy -- 4.3 Unique Mobile Application for Increased Safety -- 4.4 Systematic Evaluation as a Tool for Strong Communities -- 4.5 Preparedness for Climate Change in Communal Life -- 4.6 Green and Living Housing Estates. 4.7 Strategy with Clear Measures, Timeline, and Responsibility -- 4.8 Long-Term Visions by European Values -- 5 Discussion -- 6 Conclusion -- References -- Coastal Land Use Planning. An Integrated Approach Between Environmental Protection, Economic Competition and National Defense -- 1 Introduction -- 2 The Use of Coastal Landscapes in Sardinia -- 3 Coastal Use Plan in the Island Context of Sardinia -- 4 Material and Method -- 4.1 The PUL of the Municipality of Villaputzu. Quirra Beach as a Case Study -- 5 Discussion

and Conclusions -- References -- Post-seismic Reconstruction Planning. A Space-Time Scheduling Multi-prospects Model -- 1 Introduction -- 1.1 Framework -- 1.2 Contents and Aims -- 2 Materials -- 3 Method -- 3.1 Approach and Axiological Coordinates -- 3.2 The Model. Valuation and Decision-Making Pathways -- 3.3 Valuation Pathway. Static and Dynamic Assessments -- 3.4 Decision-Making Pathways. The Two Levels of Programming -- 3.5 The Timetable Web-GIS Platform -- 4 Application and Results -- 5 Discussions and Conclusions -- References -- The Urban Life Cycle in the Italian Demographic Winter. An Analysis on Metropolitan Cities -- 1 Introduction -- 2 The Urban Lifecycle and Demography. A Review -- 3 The Study Area, Data and Method -- 3.1 The Study Area -- 3.2 Data -- 3.3 Methods -- 4 Results and Discussion -- 5 Conclusions -- References -- National Spatial Data Infrastructure (NSDI) for Resilient Territorial Development: Building a National Disaster Risk Register (DRR) for Serbia -- 1 Introduction -- 2 Geospatial Information and Services for Disaster Risk Reduction and Resilient Territorial Development -- 2.1 Geospatial Information and Services for Disaster Risk Reduction -- 2.2 Towards Resilient Territorial Development -- 3 Background -- 4 Disaster Risk Register -- 4.1 DRR Concept -- 4.2 DRR Data -- 4.3 DRR Services. 5 Discussion: DRR and Its Application for Territorial Resilience -- 6 Conclusions -- References -- Serious Digital Geogames and Their Implementations Enhanced by Artificial Intelligence, Mixed- and Augmented-Reality -- 1 Introduction -- 2 Serious Digital Geogames and Their Implementations -- 2.1 Research on Serious Digital Geogames -- 2.2 Application Areas of Serious Digital Geogames -- 3 Mixed-Reality Serious Digital Geogames -- 3.1 Mixed-Reality (MR) -- 3.2 Developing Mixed-Reality Serious Geogames -- 3.3 Augmented-Reality Geogames -- 4 Artificial Intelligence for Digital Serious Geogames -- 4.1 Virtualized Geometry -- 4.2 Procedural Content Generation (PCG) -- 4.3 Games Adapting to the Players' Behavior -- 5 AI Opportunities for Serious Digital Geogames -- 6 Conclusions and Further Research -- References -- Mapping Emotional Landscapes: Understanding the Interplay of Emotions and the Built Environment in Potenza, Italy -- 1 Introduction -- 2 Literature Review -- 3 Methodology -- 3.1 Reconstruction of the Spatial Dataset -- 3.2 Formulation of a Map-Based Survey -- 3.3 Configurational Indicators -- 3.4 Access to Urban Services -- 3.5 Categorization and Characterisation of Segments -- 4 Results -- 5 Discussion and Conclusion -- References -- Application of the 15-Minute City Criteria to a Metropolitan Area: The Case Study of the Metropolitan City of Cagliari, Italy -- 1 Introduction -- 2 Literature Review -- 3 Methodology -- 3.1 Space Syntax -- 3.2 Place Syntax Toolkit -- 3.3 Organization of the Study -- 4 Results -- 5 Discussion and Conclusions -- References -- Computational Methods for Porous Geomaterials (CompPor 2024) -- Numerical Modeling of Fluid-Saturated Porous Sample Loading Based on Thermodynamically Compatible System Theory -- 1 Introduction -- 2 Quasi-Static Approximation for Poroelastic Model -- 3 Numerical Method. 4 Numerical Experiment of Heterogeneous Sample Loading -- 5 Numerical Results -- 6 Conclusion -- References -- Construction of Relative Permeability Curves by Numerical Simulation of Two-Phase Flow in 3D CT-Models -- 1 Introduction -- 2 Statement of the Problem -- 3 Finite Difference Approximation -- 4 Numerical Experiments -- 4.1 Numerical Simulation of Primary Drainage -- 4.2 Numerical Simulation of Water Re-saturation -- 4.3 Effective and Relative Permeabilities Curves -- 5 Conclusion -- References -- NDM-Net and

Model Changes -- 1 Introduction -- 2 Statement of the Problem -- 2.1 Seismic Modelling -- 2.2 Finite-Difference Scheme -- 2.3 NDM-Net -- 3 Numerical Experiments -- 3.1 Input Data -- 4 Training Results -- 4.1 Two Stage of Training NDM-Net -- 4.2 Zero Offset -- 5 Conclusion -- References -- Effective Numerical Dispersion Suppression in 3D Seismic Modeling -- 1 Introduction -- 2 Statement of the Problem -- 2.1 3D NDM-Net in Frequency Domain -- 3 Experimental Computations and Analysis -- 3.1 Model Description -- 3.2 Numerical Experiment 1 -- 3.3 Numerical Experiment 2 -- 4 Conclusion -- A 3D NDM-Net Technical Description -- References -- Dependence of CO₂ Breakthrough on the Sorbent Packing -- 1 Introduction -- 2 Mathematical Problem Formulation -- 3 Numerical Methods -- 4 Model Construction -- 5 Numerical Experiments -- 6 Conclusion -- References -- Solve the Quasi-static Biot Problem on Shared Memory Systems with Various Processors -- 1 Introduction -- 2 Poroelastic Problem in Terms of Biot Equations in Quasi-static State -- 2.1 Discretisation of Biot Equations -- 3 Mixed Iterative-Direct SLAE Solver -- 3.1 BCGStab Based Iterative Solver -- 3.2 Field-Split Preconditioner -- 4 Software Implementation -- 5 Numerical Experiments -- 5.1 Stress and Pressure Visualisation -- 5.2 Characteristics of the Computational Process -- 6 Conclusion. References.

Sommario/riassunto

This eleven-volume set LNCS 14815 – 14825 constitutes the refereed workshop proceedings of the 24th International Conference on Computational Science and Its Applications, ICCSA 2024, held at Hanoi, Vietnam, during July 1–4, 2024. The 281 full papers, 17 short papers and 2 PHD showcase papers included in this volume were carefully reviewed and selected from a total of 450 submissions. In addition, the conference consisted of 55 workshops, focusing on very topical issues of importance to science, technology and society: from new mathematical approaches for solving complex computational systems, to information and knowledge in the Internet of Things, new statistical and optimization methods, several Artificial Intelligence approaches, sustainability issues, smart cities and related technologies.
