

1. Record Nr.	UNINA9910878090903321
Titolo	Involuntary memory // edited by John H. Mace
Pubbl/distr/stampa	Malden, MA, : Blackwell Pub., c2007
ISBN	1-280-93258-9 9786610932580 0-470-77406-1 1-4051-8214-8
Descrizione fisica	1 online resource (246 p.)
Collana	New perspectives in cognitive psychology
Altri autori (Persone)	MaceJohn H
Disciplina	153.1/3
Soggetti	Involuntary memory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Involuntary memory : concept and theory / John H. Mace -- Involuntary autobiographical memories : speculations, findings and an attempt to integrate them / Dorthe Berntsen -- Does involuntary remembering occur during voluntary remembering? / John H. Mace -- The role of involuntary memories in posttraumatic disorder and psychosis / Craig Steel and Emily A. Holmes -- Effects of age on involuntary autobiographical memories / Simone Schlagman, Lia Kvavilashvili & Joerg Schulz -- Cues to the gusts of memory / Christopher T. Ball, John H. Mace, and Hercilia Corona -- Can we elicit involuntary autobiographical memories in the laboratory? / Christopher T. Ball -- Interaction between retrieval intentionality and emotional intensity : investigating the neural correlates of experimentally induced involuntary memories / Nicoline M. Hall -- How deliberate, spontaneous and unwanted memories emerge in a computational model of consciousness / Bernard J. Baars, Uma Ramamurthy, and Stan Franklin -- Three variations of the unexpected / George Mandler.
Sommario/riassunto	Involuntary memory was identified by the pioneering memory researcher Hermann Ebbinghaus more than a century ago, but it was not until very recently that cognitive psychologists began to study this memory phenomenon. This book is the first to examine key topics and cutting-edge research in involuntary memory. Discusses topics such as

involuntary memories in everyday life, across the life-span, and in the laboratory; the special ways in which involuntary memories sometimes manifest themselves and a number of theoretical treatments of the topic. Presents innovative research
