Nota di contenuto	Variational methods for Ginzburg-Landau equations -- Geometric evolution equations for hypersurfaces -- Variational models for microstructure and phase transitions -- Parametric surfaces of prescribed mean curvature.
Sommario/riassunto	The international summer school on Calculus of Variations and Geometric Evolution Problems was held at Cetraro, Italy, 1996. The contributions to this volume reflect quite closely the lectures given at Cetraro which have provided an image of a fairly broad field in analysis where in recent years we have seen many important contributions. Among the topics treated in the courses were variational methods for Ginzburg-Landau equations, variational models for microstructure and phase transitions, a variational treatment of the Plateau problem for surfaces of prescribed mean curvature in Riemannian manifolds - both from the classical point of view and in the setting of geometric measure theory.

Sommario/riassunto

This book provides a concise and analytical introduction to private international law in Hungary: international jurisdiction of courts, choice of law (applicable law) and the recognition and enforcement of foreign judicial decisions. It presents both Hungarian conflicts rules and their judicial practice and the application of EU conflicts rules by Hungarian courts.
