Chapter 16: Lessons Learned from The eQuality Project: Privacy and Equality for Youth in Networked Spaces -- Afterword -- Bibliography -- Index.

Sommario/riassunto

The influence of austerity measures and neoliberal ideologies has sparked discussions about the relevance and value of academic institutions, particularly in the humanities and social sciences. Universities are redirecting academic focus towards greater societal engagement. This book argues that academia has much to gain by moving beyond its institutional walls, in our case, by doing data work with stakeholders and civil society. This collaborative work benefits citizens in our democratic, open societies and advances our knowledge economies. Collaborative Research in the Datafied Society offers a combination of theoretical insights, practical methodologies, and case studies, showcasing the power of collaborative research with stakeholders across diverse communities and civil society to tackle challenges that address pressing issues stemming from data practices and social justice issues. Taken together, the book's chapters formulate relevant concepts for grounding societally engaged research in the theories and methodologies from different disciplines. In addition, the book informs university administrators and research directors how to advance academia effectively towards mutual knowledge transfer with societal sectors.
