

1. Record Nr.	UNINA9910878976503321
Titolo	Innovation in Smart and Sustainable Infrastructure, Volume 2 : Select Proceeding of ISSI 2022 // edited by Dhruvesh Patel, Byungmin Kim, Dawei Han
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2024
ISBN	981-9739-94-2
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (736 pages)
Collana	Lecture Notes in Civil Engineering, , 2366-2565 ; ; 485
Disciplina	624.068
Soggetti	Buildings - Design and construction Construction industry - Management Building materials Building Construction and Design Construction Management Building Materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	A Dam Break Analysis of Damanganga Dam using HEC RAS 2D Hydrodynamic Modelling and Geospatial Techniques -- Enhancing the Optimum Water Requirement for The Crop Using the Contemporary Capillary Wick Irrigation Method a Case of an Experimental Demonstration -- A comparative assessment of Unsupervised and Supervised methodologies for LANDSAT 8 Satellite Image Classification -- Comparison Of Image Processing Techniques To Identify The Land Use Land Cover Changes In The Indian Semi Arid Region -- Application of Open-source Geospatial and modeling techniques for flood assessment and management A case of flood 2017 Rel river catchment -- Evaluation of Movement of Wetting Front under Wick irrigation in black cotton Soil -- One Dimensional Steady Flow Analysis Using HEC-RAS A Case of Sabarmati River Gujarat India -- Reliability Resilience Vulnerability Analysis of Droughts over Maharashtra -- Remote Sensing and GIS Application for Soil Erosion and Sediment Yield Estimation of Purna River sub basin.
Sommario/riassunto	This book presents select peer-reviewed proceedings of the

International Conference on Innovation in Smart and Sustainable Infrastructure (ISSI2022). The contents focus on smart infrastructure and cities, construction and infrastructure project management, application of building information modelling, sustainable materials and methods for road construction, smart technologies, applications and services for transportation systems, remote sensing and GIS for water resources management, climate change and prediction analysis, model simulation and analysis, seismic engineering and soil dynamics, innovation geo-materials and geosynthetics, computational geotechnics, emerging technologies in smart mobility and transport planning, among others. This volume will be useful for researchers and professionals in civil engineering and allied fields. .
