

1. Record Nr.	UNISA996396362303316
Titolo	By the King. A proclamation for restraint of excessiue carriages, to the destruction of the high vvayes [[electronic resource]]
Pubbl/distr/stampa	Imprinted at London, : By Robert Barker, printer to the Kings most excellent Maiestie : and by the assignes of Iohn Bill, 1635
Descrizione fisica	2 sheets ([2] p.)
Altri autori (Persone)	Charles, King of England, <1600-1649.>
Soggetti	Carriages and carts - Law and legislation - England Roads - Maintenance and repair
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Caption title. Dated at end: Hampton-Court, the first day of Nouember, in the eleuenth yeere of our reigne. Imprint from colophon. Reproduction of the original in the British Library. Arms 24; Steele notation: Father, like 2) hereto- pleasure.
Sommario/riassunto	eebo-0018

2. Record Nr.	UNINA9910879594003321
Autore	Wassertheil-Smoller Sylvia
Titolo	Biostatistics and Epidemiology : A Primer for Health and Biomedical Professionals / / by Sylvia Wassertheil-Smoller, Jordan Smoller
Pubbl/distr/stampa	Springer Nature, 2024
ISBN	3-031-53043-8
Edizione	[5th ed. 2024.]
Descrizione fisica	1 online resource (239 pages)
Disciplina	610.724
Soggetti	Biometry Medicine - Research Biology - Research Epidemiology Public health Biostatistics Biomedical Research Public Health Biometria Assaigs clínics Epidemiologia Estadística matemàtica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. The Scientific Method -- 2. A Little Bit of Probability -- 3. Mostly About Statistics -- 4. Mostly About Epidemiology -- 5. Mostly About Screening -- 6. Mostly About Clinical Trials -- 7. Mostly About Quality of Life -- 8. Mostly About Genetic Epidemiology -- 9. Risk Prediction and Risk Classification -- 10. Research Ethics and Statistics -- Postscript -- Appendix A -- Appendix B -- Appendix C -- Appendix D -- Appendix E -- Appendix F -- Appendix G. References -- Suggested Readings -- Index.
Sommario/riassunto	Since the publication of the 1st edition, Biostatistics and Epidemiology has attracted loyal readers from various specialty areas in the

biomedical community. Not only does this textbook teach foundations of epidemiological design and statistical methods, but it also includes topics applicable to new areas of research. The 5th Edition includes coverage of fixed and random effects and mixed effects models; Poisson regression; constructing confidence intervals for U-shaped relationships; analysis of rare variants; Mendelian randomization; and aspects of machine learning and big data analytics. Biostatistics and Epidemiology was written to be accessible for readers without backgrounds in mathematics. It provides clear explanations of underlying principles, as well as practical guidelines of “how to do it” and “how to interpret it.” Key features include a philosophical and logical explanation at the beginning of the book, subsections that can stand alone or serve as reference, cross-referencing, recommended reading, and appendices covering sample calculations for various statistics in the text.
