Sommario/riassunto

Cyberhate is defined as racist, discriminatory, negationist and violent statements made on social network platforms, text platforms, comment pages, and more. The Handbook on Cyber Hate, the Modern Cyber Evil, includes twenty-seven chapters from scholars representing over fifteen countries from the Global North and the Global South demonstrating a range of multi-faceted perspectives. While providing such a focus, these papers will also operate with a constantly evolving conceptualization of contemporary societies and their modern cyber-evil. Indeed, modern cyber-evil is a global concern and is primarily based on human minds and activities, and on deviant uses of modern technologies, which may differ ideologically, historically and culturally on the global map of modern legal systems. This plurality of perspectives, which poses a challenge to our future, is a strength of this handbook that offers a variety of foundations, legal perspectives, and popular developments in an effort to suggest measures to combat this modern cyber-evil infecting communications around the world. Editors Anne Wagner and Sarah Marusek offer a unique collection of chapters involving the theoretical foundations, legal perspectives, and societal perspectives from popular culture of modern cyber evil in order to address and combat racism on the basis of alleged race, skin color, nationality, descent and national or ethnic origin, etc.; discrimination/xenophobia on the basis of sex, gender, sexual orientation, religious or philosophical beliefs, health status, physical characteristics, etc.; hatred; violence; e-predation; and e-victimization.
