

1. Record Nr.	UNINA9910882894203321
Autore	Baloh Robert W
Titolo	Brain Electricity : The Interwoven History of Electricity and Neuroscience // by Robert W. Baloh
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031629945 9783031629938
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (436 pages)
Disciplina	612.8
Soggetti	Neurosciences Science - History Neuroscience History of Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The Mystery of Electromagnetism -- The Early Age of Electrotherapy -- Animal Electricity -- Electricity and Magnetism -- Two Sides of the Same Coin -- Electricity and the Nervous System -- Electrotherapy and Early Neurology -- Electromagnetic Waves -- Ether, Cathode Rays and Electrons -- The Battle of Electric Currents -- Electrophysiology in the 20th Century -- Brain Waves and Brain Stimulation -- Quantum theory and Modern Neuroscience -- Overview.
Sommario/riassunto	This book traces the intertwining story of electricity and neuroscience from ancient times to the late 20th century. Throughout the book, basic concepts of electricity, electromagnetism, and neuroscience are addressed and illustrated. It is replete with remarkable discoveries and colorful characters that dramatically changed human culture. Electricity and neuroscience are topics that have fascinated science historians for centuries. Yet, it has only been over the past several decades that medical science historians have appreciated the close interrelationship of these two topics. Robert Baloh uses a historical context of discovery to provide an ideal framework for understanding modern concepts of electricity and neuroscience. The stories of these pioneering researchers can be inspirational for those beginning a career in

neuroscience as well as for more experienced researchers.
