Descrizione fisica	1 online resource (180 pages): : illustrations ;
Collana	Perspectives in medical humanities
Disciplina	362.592
Soggetti	Nurses Narrative medicine Medicine and the humanities Homeless persons - Care Infirmieres Medecine et sciences humaines Medecine narrative Sans-abri - Soins Narration Socioeconomic Factors Narrative Medicine Nursing Care - psychology Ill-Housed Persons - psychology Recits personnels. Personal narratives. Biographies Personal narratives Personal Narrative Electronic books. United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.

Nota di contenuto

Soul story -- Walk in my shoes -- Witness: on seeing -- Witness: on telling -- Listen, carefully -- Where the homeless go -- Steps to foot care -- Foot notes -- Way out; way home -- Past forgiveness -- The body remembers -- Endurance test -- An overexamined life -- Lab notebook -- Medical maze -- Degree of latitude -- Epilogue -- Acknowledgments -- Narrative medical resources.

Sommario/riassunto

"Soul Stories is an exploration of the boundaries of narrative within health and healing in the context of trauma and homelessness. It draws upon scholarly research across a range of disciplines, and is informed by Ensign's thirty years' experience as a nurse providing health care to people marginalized by poverty and homelessness, by her personal journey through homelessness as a young adult, and by her experience of teaching critical reflective practice to health science students. Soul Stories deepens our understanding of homelessness; trauma and resilience; gender-based violence; the role of narrative in health and healing; and ways we can humanize health care for patients, providers, and communities. It contributes to civically and community-engaged scholarship in the health humanities."--Amazon.com.
