

1. Record Nr.	UNINA9910886083103321
Titolo	Gastrointestinal Malignancies // edited by David Bentrem, Al B. Benson
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	3-031-61238-8
Edizione	[2nd ed. 2024.]
Descrizione fisica	1 online resource (418 pages)
Collana	Cancer Treatment and Research, , 2509-8497 ; ; 192
Disciplina	616.99433
Soggetti	Oncology Gastroenterology Interventional radiology Interventional Radiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Environmental and Genetic Risk Factors for Gastric Cancer -- Pathologic Features of Esophageal and Gastric Malignancies -- Pathologic Features of Miscellaneous Foregut Malignancies -- Pancreatic Cancer -- Pathologic Features of Primary Pancreatic Malignancies -- Contemporary trials evaluating neoadjuvant therapy for resectable pancreatic cancer -- A NSQIP-Based Randomized Clinical Trial Evaluating Choice of Prophylactic Antibiotics for Pancreaticoduodenectomy -- Gallbladder Cancer -- Diagnosis and Management of Intrahepatic and Extrahepatic Cholangiocarcinoma -- Hepatocellular Carcinoma: Surgical Management and Evolving Therapies -- Locoregional Therapies for Primary and Secondary Hepatic Malignancies -- Pathologic Features of Primary Colon, Rectal and Anal Malignancies -- Hepatic artery infusion therapy for Metastatic Hepatic Malignancies -- Immunotherapy/ Immunology of Gastrointestinal Tumors -- Genetic Implications to Clinical Applications.
Sommario/riassunto	This book now published in its fully updated second edition comprehensively summarizes the current state of knowledge on malignancies of the gastrointestinal tract and highlights the latest efforts in multimodality treatment options before and after surgery, important ongoing trials as well as future areas of investigation. Dedicated organ-based chapters evaluate current treatments and

management and provide information on incidence, etiology and biological characteristics. The state of the art in the radiologic and endoscopic staging of gastrointestinal malignancies is described, and guidance is offered on the role of interventional radiology and interventional gastroenterology in the treatment of these challenging tumors. In addition, the book explores novel and evolving treatments, including Immunotherapy, personalized systemic therapy and minimally invasive surgical and radiology techniques, and addresses patient-reported outcomes and survivorship challenges. It will be of benefit to all surgeons, oncologists and other specialists who treat these malignancies, as well as to trainees looking to increase their understanding of the field.
