

1. Record Nr.	UNINA9910887856603321
Titolo	Crash course chemistry. 1, The nucleus
Pubbl/distr/stampa	Arlington, VA : , : PBS Crash Course, , 2013
Descrizione fisica	1 online resource (10 minutes)
Collana	Academic Video Online
Soggetti	Chemistry - Study and teaching Atoms Nuclear structure Instructional films.
Lingua di pubblicazione	Inglese
Formato	Videoregistrazione
Livello bibliografico	Monografia
Note generali	Title from resource description page (viewed February 3, 2021).
Sommario/riassunto	Hank does his best to convince us that chemistry is not torture, but is instead the amazing and beautiful science of stuff. Chemistry can tell us how three tiny particles - the proton, neutron and electron - come together in trillions of combinations to form ... everything. In this inaugural episode of Crash Course Chemistry, we start out with one of the biggest ideas in chemistry ever - stuff is made from atoms. More specifically, we learn about the properties of the nucleus and why they are important to defining what an atom actually is. Table of Contents: Einstein & Atoms 02:05, Composition of Atoms 03:18, Atomic Number 04:20, Isotopes 08:04, Relative Atomic Mass 07:26, Mass Number 07: 44.
