1. Record Nr.   UNINA9910887892403321

   Autore   Han Jie

   Titolo   ChatGPT in Scientific Research and Writing : A Beginner's Guide / / by
                      Jie Han, Wei Qiu, Eric Lichtfouse

   Pubbl/distr/stampa Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024

   ISBN   9783031669408
                      3031669401

   Edizione   [1st ed. 2024.]

   Descrizione fisica 1 online resource (139 pages) : illustrations

   Disciplina   006.35

   Soggetti   Medicine - Research
                      Biology - Research
                      Biology
                      Biomedical Research
                      Biological Sciences

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto -- Introduction. -- Extracting key points or specific information from
                      research papers. -- Interpreting figures and correlating to specific
                      conclusions. -- Evaluation of research papers. -- Spotting errors. --
                      Responding to reviewer comments. -- Advanced language editing. --
                      Crafting article titles. -- Design of experimental studies. -- Design of
                      public surveys. -- Writing research proposals.

   Sommario/riassunto Most scientists are constantly under pressure for reading essential
                      literature, designing new experiments, writing successful proposals and
                      papers, and meeting deadlines. However, imagine that your brain is
                      connected to the entire human knowledge and can extract instantly
                      essential information for discovery. Imagine that research tasks that
                      took days to months can now be done within few seconds. This is not
                      science fiction anymore since the onset of generative artificial
                      intelligence tools such as ChatGPT. This book explains concisely and
                      simply how to use ChatGPT for identifying new results, crafting titles,
                      editing language, interpreting figures, creating visuals, and refining
                      methods. ChatGPT even allows for brainstorming, designing
                      experiments, writing proposals, responding to reviewers, and

evaluating research papers. Written for researchers with no background in coding or prompt engineering, this book provides the skills necessary to navigate the changing landscape of scientific research. In particular, you will learn how to leverage ChatGPT's unique capabilities to generate ideas, streamline literature reviews, and craft compelling narratives. In short, this book empowers you to unlock the potential of ChatGPT, boosting productivity, and take your scientific research and writing to new heights.
