## Sommario/riassunto

The global economic crisis of 2008-2009 exposed systemic failings at the core of economic policy making worldwide. The crisis came on top of several other crises, including skyrocketing and highly volatile world food and energy prices and climate change. This book argues that new policy approaches are needed to address such devastating global development challenges and to avoid the potentially catastrophic consequences to livelihoods worldwide that would result from present approaches. The contributors to the book are independent development experts, brought together by the UN to identify a de
