Sommario/riassunto	This book, 'Verfassung und der Städte Siebenter Band,' is a scholarly work examining the structure and evolution of municipal government in England, France, and North America. It includes contributions from various authors such as F. W. Hirst, H. Berthelemy, Frank J. Goodnow,

and Delos F. Wilcox, offering insights into the historical and contemporary organization of cities. The text discusses the municipal systems, their historical development, and the interaction between local and state governments. It also covers specific topics like municipal finance, public health, education, and police services across major cities like London, New York, Chicago, and Paris. The book is intended for scholars and students of political science, history, and urban studies, aiming to provide a comprehensive understanding of municipal governance in the early 20th century.
