Sommario/riassunto

This book, authored by Dr. Heinrich Lücker and published by Duncker Humblot in 1910, explores the development and challenges of urban and rural financial systems in Prussian municipalities. It is part of a series commissioned by the Association for Social Policy. The text delves into various fiscal topics including fees, contributions, indirect taxes, and land taxes. It examines how legal reforms, shaped by historical influences, have impacted financial legislation and municipal finance management, particularly in industrial regions and large villages. The author discusses the constraints imposed by government regulations on municipal revenue generation, highlighting the need for reform to better align with contemporary economic realities. The book offers insights into the complexities of local governance and fiscal policy, providing a detailed analysis of taxation and municipal services. Intended for scholars and policymakers, it serves as a historical and analytical resource on pre-World War I Prussian municipal finance.
