Sommario/riassunto

This book presents a detailed examination of the socio-economic and administrative structures of urban and rural communities in Germany, particularly focusing on the early 20th century. It discusses the roles and responsibilities of municipalities, the impact of industrialization, and the political dynamics affecting municipal governance. The author aims to explore the challenges and developments in local administration, emphasizing the influence of growing urban populations and the industrial workforce on political processes. The book is intended for scholars and policymakers interested in social policy, urban studies, and historical governance structures.
