

1. Record Nr.	UNINA9910888490003321
Titolo	Extinction // Produced by Evan Clark
Pubbl/distr/stampa	Geelong, Victoria : , : Switch International, , 2010
Descrizione fisica	1 online resource (24 minutes)
Collana	Extreme Environments ; ; 22
Soggetti	Biology Environmental Science Animals Environment Documentary
Lingua di pubblicazione	Inglese
Formato	Videoregistrazione
Livello bibliografico	Monografia
Note generali	Title from resource description page (viewed March 29, 2016).
Sommario/riassunto	Our planet's untouched natural environments are shrinking, due to pressure from human populations. As these areas decline, the creatures adapted to live in them face a decline in numbers, and sometimes even extinction altogether. Many biologists believe that if we don't act quickly, half the world's species will be gone in 100 years. A report called the Living Planet Index reveals that from 1970 to 2000, populations of terrestrial and marine species dropped by 30 percent, while freshwater populations went down by a massive fifty percent.
