Sommario/riassunto	Apparu en Europe centrale au xviii ^e siècle, le vampire est une figure de l'imaginaire née de la confrontation de l'Occident et du monde ottoman. L'auteur présente la naissance de ce thème en Europe centrale, la construction d'un mythe du vampire. Il analyse son évolution en motif littéraire lorsque le vampire perd sa dimension explicatrice du réel en arrivant en France et en Grande-Bretagne. Le vampire devient un jeu romantique. L'étude est accompagnée du corpus des textes qui ont forgé l'image du vampire : la nouvelle fondatrice de Polidori ; le roman initial de Bérard ; les trois adaptations théâtrales de Nodier, Scribe et Dumas ; la nouvelle de Gautier et celle, en extraits, de Mérimée. Cet ouvrage intéressera un large public, du lecteur de textes fantastiques au spécialiste du romantisme.

Sommario/riassunto	This academic volume, edited by Dr. Pervin Bezirci and Dr. Ilknur Sert, explores contemporary approaches to information and records management in the context of the 100th anniversary of the Republic of Turkey. The book examines the historical development of Turkish librarianship, the role of expert reports, and the evolution of library education and services over time. It also addresses modern challenges and innovations in information science, such as digital transformation, artificial intelligence, open science policies, and the role of libraries in the digital age. The work features contributions from various scholars, providing insights into both historical perspectives and cutting-edge developments in the field. The intended audience is academics, professionals, and students in library and information science, as well as policymakers and practitioners interested in the intersection of technology and knowledge management.
