Sommario/riassunto This book, authored by Richard Marney and Timothy Stubbs, provides an in-depth exploration of debt restructuring in emerging markets. It offers a comprehensive analysis of the financial, institutional, and regulatory challenges faced in these markets. The authors draw on decades of experience to present actionable strategies and insights

through theoretical frameworks and extensive case studies. The book

emphasizes the importance of understanding local institutional

frameworks and macroeconomic factors in successful debt restructuring. It is intended for restructuring financiers, policymakers, and both seasoned professionals and newcomers interested in emerging market economies.
