Sommario/riassunto	The "cultural turn" has been a multifarious and pervasive phenomenon in Western universities and modes of social knowledge since the early 1980s. This volume focuses on the conjunction of two disciplines where both the analytic promises as well as the difficulties involved in the meeting of humanist and social science approaches soon became obvious. Anthropologists and historians have come together here in order to recapture, elaborate, and criticize pre-Cultural Turn and non- Cultural Turn modes of analysing structures of experience, feeling, subjectivity and action in human societies and to highlight the still

unexploited possibilities developed among others in the work of scholars such as Norbert Elias, Max Gluckman, Eric Wolf, E.P. Thompson and Raymond Williams.

Sommario/riassunto	This book gathers the proceedings of the 18th World Conference on Seismic Isolation (18WCSI), held in Antalya, Turkey, on November 6-10, 2023. Organized by Turkish Association for Seismic Isolation (TASI) and endorsed by Anti-Seismic Systems International Society (ASSISi Association), the conference discussed state-of-the-art information as well as emerging concepts and innovative applications related to seismic isolation, energy dissipation, and active vibration control of structures, resilience, and sustainability. The book covers highly diverse topics, including earthquake-resistant construction, protection from

natural and man-made impacts, safety of structures, vulnerability, international standards on structures with seismic isolation, seismic isolation in existing structures and cultural heritage, seismic isolation in high-rise buildings, and seismic protection of non-structural elements, equipment, and statues. .
