5. Record Nr.	UNINA9910437948303321
Titolo	Regional assessment of climate change in the Mediterranean . Volume 3 Case studies // Antonio Navarra, Laurence Tubiana, editors
Pubbl/distr/stampa	Dordrecht ; ; New York : , : Springer, , [2013]
ISBN	9789400757691 94-007-5769-7
Descrizione fisica	1 online resource (245 pages)
Collana	Advances in global change research, , 1574-0919 ; ; v.52
Disciplina	551.691822
Soggetti	Climatic changes - Environmental aspects - Mediterranean Region Climatology Canvis climàtics - Estudi de casos - Mediterrània, Regió Mediterrània, Regió Clima Estudi de casos
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	PART V: Case Studies -- Introduction -- 1. Stakeholders -- 2. Physical and Socio-Economic Indicators -- 3. Climate Impact Assessments -- 4. Integration of the Climate Impact Assessments With Future Projections -- 5. Synthesis and the Assessment of Adaptation Measures -- Executive Summary -- Appendix -- Index.
Sommario/riassunto	This is the third volume of a three-volume final report, which thoroughly describes, synthesizes and analyzes the results of the four-year Integrated Research Project CIRCE – Climate Change and Impact Research: Mediterranean Environment, funded by the EU 6th Framework Programme. Conducted under the auspices of the National Institute of Geophysics and Volcanology in Rome, Italy, the study was designed to predict and to quantify the physical impacts of climate change in the Mediterranean, and to assess the most influential consequences for the population of the region. Volume 3 is dedicated to the results of case-studies performed in CIRCE. These provide interesting additional materials to the assessments in the other parts and certainly they represent a rare example of integrated analysis of the impact of climate change. The case studies collected here represent urban, rural and coastal environments, drawn from the north and the south of the

Mediterranean shore. Discussion also includes the involvement of stakeholders, the level of engagement and the data and knowledge indicators used in the assessment and adaptation strategies. Volume 1, subtitled Air, Sea and Precipitation, comprises Parts 1 and 2 of the report, which reviews current knowledge of observed climate variability and trends in the Mediterranean, and includes descriptions of available temperature and precipitation station Volume 2, subtitled Agriculture, Forests and Ecosystem Services and People, comprises Parts 3 and 4 of the report. These focus respectively on ecosystem services and socio-economic impacts of climate change in the Mediterranean region. Regional Assessment of Climate Change in the Mediterranean represents a research initiative of unprecedented size and scope. Each volume is carefully constructed to stand alone, offering a wealth of information and insight. Beyond its own significant value, the report is expected to contribute to a rapidly expanding body of research and analysis on the topic.
